

"As an architect, you design for the present, with an awareness of the past, for a future which is essentially unknown."
— Norman Foster

YOUR CAREER AS AN ARCHITECT

Architecture expresses elements of art and culture in every built form. Just as well, only built form designed by an architect appeals to and lifts the spirit onto a higher plane. The discipline of architecture has been around from the time homo sapiens began designing and constructing shelter. Growing number of urban settlements in India and in the South Asian region is creating more demand for architects and for specialisations within the discipline of architecture, most notably sustainable buildings, green buildings, building information modelling, city planning and design.

Sky is the limit for growth in the discipline. Architects design cities, high rise buildings, community and sports facilities, schools, hospitals, bridges, and of course homes for us all. Following completion of the five year architecture program, young architects are encouraged to gain practical exposure by joining an architectural firm for a few years before venturing out on their own. Identifying the right architectural firm is of paramount importance here. Other career opportunities include jobs in the government, NGOs, and the private sector.

The discipline is creative in every sense of the word. The Architect is the Commander-in-Chief of all projects he or she designs and unlike music, where the same group plays the same song the same way in different cities, no two architectural projects are alike. The career of an architect is therefore one of lifelong creation and positive contribution to nation building.

B.Arch.

5 Year Undergraduate Degree
from Woxsen University, Hyderabad

B.Arch.

EXPERIENCING IS BELIEVING

The late Charles Correa reminded us that just as there is writing and then there is literature, there is construction and then there is architecture. Great architecture can change society. The B.Arch. program at Woxsen is designed to change and impact society most meaningfully.

Our Design Studios are designed for learning by doing. We offer every student the most personalized learning experience in our Architectural Design Studios and Model making workshops. We encourage you to interact with our globally renowned faculty and experience our built form before joining our B.Arch. program, which will transform you into global leaders in the practice of architecture and built environment. On successful completion of the program, you will obtain professional licensure in architecture.

ADMISSION TO B.Arch PROGRAM

The program is open to students who have:

- Passed 10+2/Intermediate examination with Physics, Chemistry, Mathematics & English from a recognized Board, with minimum 50% marks in Physics, Chemistry and Mathematics and also 50% marks in aggregate of the 10+2 level examination, or
- Passed 3 year Diploma (any stream) with Mathematics & English as compulsory subjects from a Central/State Government recognized Board, with minimum 50% aggregate marks.

Applicants must have a valid NATA (National Aptitude Test in Architecture) score conducted by Council of Architecture (COA) or JEE Mains Paper II score. All students seeking admission are expected to be proficient in the English language and should be willing to learn all computing applications made available to students at our Mac Computer Laboratories.

OUR B.Arch PROGRAM FOR TRANSFORMATIONAL ARCHITECTS

We administer the Program in Semester system of education. During your five-year program, you will be required to dive deep into wide ranging subjects such as Climatology, Lighting & Acoustics, Building Services, Estimation & Costing, Strength of Materials, Surveying, Computing in Architecture, Project Management, and Urban Planning. The 9th Semester of the Program is allocated for Practical Training at an established Architect's Office anywhere in India.

We will inculcate in you the ability to celebrate culture, places, and meaning through architectural expression. In so doing, the School will transform you into the nation's most coveted architects with the following inherent qualities:

- The strongest sense of direction and purpose in designing and creating a sustainably better future for the planet;
- The spirit of critical thinking and inquiry fueled by multidimensional learning and complete understanding of architectural theory and practice;
- Life-long yearning to learn from beyond the envelope of conventional learning; and
- The spirit of entrepreneurship with the courage to experiment, innovate, question status-quo, and develop bold environmentally responsible architecture.

WOXSEN ADVANTAGE

Woxsenians excel in education as they also do in physical, social, and extracurricular activities. Besides education facilities, we therefore have at our sprawling 200 acre campus provided for you world class facilities for swimming, cricket, basketball, and other sports and games. Your education at Woxsen will transform you into the most rounded personalities in the field of architecture.

All Woxsenians are geared to attaining global benchmarks in their field of study at the campus. We foresee you joining established practices worldwide after completing your B.Arch. program and look forward to you joining our growing alumna of Woxsenian innovators making discernible and long lasting positive impact on the world stage.

STUDY ARCHITECTURE AT WOXSEN

Woxsen university offers five-year residential B.Arch. Program, leading to award of the Degree of Bachelor of Architecture. Our award winning campus is designed to inculcate in young minds a spirit of inquiry and life-long learning.

We offer Total Learning Experience (TLE) to B.Arch. students through a uniquely designed ensemble of architectural pedagogy including classroom teaching, studio design, hands-on workshops, computing and three dimensional modelling, field visits to the treasure trove of architecture in the country, exposure to construction technologies, and learning from global leaders in sustainable and environmentally responsible architectural practice.
