

### Why Career Mapping?

It is great to have opportunities around us and make the most of them when they arrive; you need to find out whether you are going to be at the helm of change or at the tail-end of it.

Does the wide range of options to study confuse you? What is your aptitude best suited for? Are you someone who recognizes the potential of a field and pursues it or are you someone who focuses only on a secure job and a food pay packet? What is the sunrise sector today may not be tomorrow, if you have chosen straight & narrow path?

Where do you go then.

Do you have it in you? How about being a Nutritionist, Biotechnologist, Pharmacist, Data Scientist. If you identify with any of the above questions, you could benefit from professional guidance to give your career dreams a kick-start

Career decisions should be broadly based on:

- Skills
- Interests
- Motivation
- Aptitude
- Personality

Often, we let go off a well-rounded approach in deciding this and take a beaten path.
