

This report displays your learning and productivity preferences. The preferences are grouped into categories. Each category requires a slightly different approach to improve your learning and productivity. Read the introductions carefully so that you understand these different approaches before you choose and apply the recommendations in the report.

Sensory Preferences

You learn with four senses. You may like to learn with only one or two, but research has shown that you benefit most when learning through multiple sensory modes. So it will help to use more than just your preferred senses.

To get started, try learning new and difficult topics by using the modes for which you have a higher preference. As you become more comfortable with a topic, begin to use your less-preferred preferences as well. Over time, you will adjust to using **all** of the sensory modes and your learning will become easier and more effective.

For example, if you prefer visual learning, you can start learning a topic through reading, pictures and diagrams. As you become more familiar with the topic, discuss it (auditory) and get involved in activities related to it (tactile and kinesthetic).

Auditory Learning

Auditory learning refers to what you can hear.

You have a very high preference for auditory learning. This means you like to learn by listening. You can probably focus on and remember almost all of the information you hear. Use the recommendations below to take advantage of this ability.

Recommendations

When you have to learn by listening, use the following recommendations. These will help you use other modes of learning at the same time, assisting your overall ability to learn.

During Instruction or Activities

- Ask for written instructions and outlines whenever possible. Keep these written materials in front of you and follow along when listening to spoken instruction.
- Read about upcoming topics for class discussion before the class. Reading ahead of time makes listening easier because you have some understanding of the topic.
- 🏹 Take notes and re-read them soon after class. You can often write them on the handouts provided by the teacher.

Working on Assignments or Independent Tasks

- Read important points and your own writing aloud to yourself. This helps combine visual information with auditory information.
- For videos, turn on closed captioning or try to find transcripts of the

Preparing for Tests or Presentations

- Use memory devices such as rhymes or repeating things aloud to vourself.
- Write out cue cards or speaking notes, even when you will not use them. Writing the words combines visual and tactile information with the auditory information.
- Have someone else quiz you on test or presentation topics and answer the questions verbally.

Kinesthetic Learning

Kinesthetic learning involves movement and physical activity.

You have a low preference for kinesthetic learning. This means you usually do not like to learn through movement and physical activity. You may find it difficult to learn new sports, trades or other physically involved activities. However, you can develop this ability through practice. Use the recommendations below.

Recommendations

During activity-based learning, use the following recommendations. These will help you use other modes of learning at the same time, assisting your overall ability to learn.

During	Instri	iction	٥r	Activities
During	mon	action	O1 /	UCITATITES

V	When learning physical skills, try to view demonstrations or videos or watch others practice the skill in addition to trying it yourself.
	Ask others who are skilled in the activity for advice. Even if you are already skilled in your own way, listen to them describe what helpsthem to be successful.
	When doing a classroom-based activity, ask questions or request a handout that describes the goals of the activity.
W	orking on Assignments or Independent Tasks
V	If you have difficulty with a physical skill, try dividing the skill into smaller steps. Practice the first part until you feel comfortable. Add more steps, one a time, to build the skill gradually.
	Work with another person who has a high kinesthetic preference. Discuss the activity and provide visual and verbal feedback to each other to improve your performance.
Pr	eparing for Tests or Presentations
	For presentations, practice with someone you trust. Have them give you feedback on posture, voice and eye contact.
V	Use a mirror or take video of yourself practicing the activity. There are many apps that can help with video analysis, such as slow-motion, split screen and drawing tools.

Tactile Learning

Tactile learning involves touching and handling objects related to what you are learning. Examples include measuring objects in math or dissecting a specimen in science.

Hiah

You have a very high preference for tactile learning — learning through touch. Lessons that use models and other physical objects definitely help you to learn a concept. You can take advantage of this ability and develop it further through practice. Use the recommendations below.

Recommendations

Use the following recommendations during situations that involve tactile learning. These will help you use other modes of learning at the same time, assisting your overall ability to learn.

During Instruction or Activities

Take notes in class.	The physical a	act of writing	uwill halp you	ramamhartha	important points

Low Tactile

Look for opportunities to "do" things in your classes — like science experiments, writing, using math-related objects, working with materials, and so on.

Working on Assignments or Independent Tasks

When reading, highlight the key ideas and then write a summary of them. Engaging your hands in the reading process will help you remember what you've read.

Use real objects to help you learn. For example, if you're studying levers in physics, find a simple one and try using it in different ways. For geography, use a globe or map to aid in studying.

Preparing for Tests or Presentations

- Keep your desk clear of distracting objects. Your tactile sense should be focused on what you are learning, not unrelated things.
- Don't forget to review notes from labs and activities that involved tactile learning. Try to remember what it was like to use your hands and what you felt with your sense of touch in those activities.

Visual Learning

Visual learning involves seeing what you are learning. Examples include reading text and viewing pictures and diagrams.

Dook for opportunities to complete assignments that are visual, such as posters or computer slide

You have a low preference for visual learning. This means you do not like to learn through reading and looking at pictures. However, you can develop this ability through practice. Use the recommendations below.

Recommendations

concepts.

presentations.

Use the following recommendations during situations that involve visual learning. These will help you use other modes of learning at the same time, assisting your overall ability to learn.

as	sisting your overall ability to learn.
	uring Instruction or Activities Learn about and take notes in visual formats such as mind maps, sketches and diagrams. Use underlining and color to highlight important points.
	Ask for written instructions and outlines whenever possible. Keep these written materials in front of you and follow along during spoken instruction.
W	orking on Assignments or Independent Tasks
	Read about upcoming topics for class discussion before the class. When you find it difficult to visualize the ideas discussed, ask for pictures, diagrams or other visual aids for those topics.
V	Organize your work area to avoid visual distractions. Any visual cues should be directly related to what you are learning.
Pi	reparing for Tests or Presentations
	Rewrite and review notes. Create flash cards to prepare for tests.
П	Visualize the test or presentation environment as you prepare. Think of visual cues in that environment to help you remember key

Environmental Preferences

These are simple preferences that don't require further development. For these, simply adjust your learning environment, when reasonable, to suit your strongest preferences.

No Intake Likes Intake

Intake

Intake refers to eating and drinking while learning or working. Some people learn better if they're able to eat or drink something. Other people find it distracting to eat or drink while learning.

You have a very high preference for intake. You really like to eat or drink while learning or studying. It probably helps you be productive.

Recommendations

Based on your results, you may want to eat or drink something while studying or working to make it easier to learn. Read the following recommendations and select the ones you think would work best for you.

1)iirina	Instruction	or Activities

✓	Bring small snacks or chew gum in your classes, if
	allowed.

If you are not allowed to snack or chew gum, try to eat just before class so you won't be distracted by

Working on Assignments or Independent Tasks

₩ Have water and nutritious snacks available while you're working.

Avoid sugary treats or too much caffeine, which can have a negative effect on your productivity.

Preparing for Tests or Presentations

If you need	to eat or	drink while	e studying	, take a	break	to have	somethi	ng and re	eturn w	hen y	ou've
finished.											

Just before a test or presentation, eat a healthy meal or snack. Make sure it's enough to prevent you from feeling hungry during the test, but not so much that you feel overly full.

ow Light Bright Light

Light

The amount of light in your learning environment can affect your achievement. Some people study and learn better in a brightly lit area, while others achieve more in dimly lit surroundings.

You have a very high preference for light. You prefer bright light for learning or studying. It helps you be productive.

Recommendations

Based on your results, you should try to learn and work in bright light when possible. Read the following recommendations and select the ones you think would work best for you.

During Instruction or Activities

If you're in a place that is too dimly lit, try sitting closer to a window.

Working on Assignments or Independent Tasks

▼ Take care to avoid shadows on your reading material.

Preparing for Tests or Presentations

Make sure you have enough overhead lighting or lamps and windows available in your study

Let your family members know that you need bright light for studying and learning.

Temperature

Research has shown that people work differently in a warm or cool environment. By making sure you are warm or cool enough, you can improve your success in learning and studying.

You have a moderate preference for learning and studying in a warm environment. You often feel uncomfortable in a cool environment. Ensuring you are warm enough can help you focus and be more productive.

Recommendations

Based on your results, you should try to make sure you are comfortably warm when studying and learning. Read the following recommendations and select the ones you think would work best for you.

During Instruction or Activities

- Always have a jacket, fleece or sweater with you, so that you can add a layer of warmth if you start to feel cold.
- Don't be afraid to ask for the heating to be turned up in the classroom.

Working on Assignments or Independent Tasks

Try sitting near a window in the sunshine or near another source of heat.

Preparing for Tests or Presentations

Make sure you have a heater in your study environment if it gets too cold for

Mobility

People with a preference for mobility need to move around to learn most effectively. It's difficult for them to sit in one place for a long time. People who prefer stillness find it easy to concentrate while sitting still for a long time.

You have no strong need to move around or remain still while learning.

Recommendations

Based on your results, your ability to learn is not affected by moving around or sitting still. Read the following recommendations and select the ones you think would work best for you.

During Instruction or Activities

Since you have no need to move when learning, think of yourself as a buffer and take your cue from those around you. If they're buzzing and fidgety, it may help your own concentration if you move around. If everyone else is sitting still, it will be less disruptive if you do the same.

Working on Assignments or Independent Tasks

Tune in to your instincts. If you spontaneously begin to tap your pen on the desk or fidget in your seat, you may find it helpful to stand and move around for a few minutes.

Preparing for Tests or Presentations

Divide up your work time to ensure you take breaks at regular intervals. Schedule a few minutes to stand up and move around at least once an hour.

Some people find silence distracting and can concentrate better when there's sound in the background. Other people require a quiet environment in which to work and learn.

You have a moderate preference for quiet when learning. You sometimes find it distracting if there's noise in the background or people walking around. Your concentration is best when you're by yourself or in a very quiet, private place.

Recommendations

Sound

Based on your results, you should try to study and learn in a quiet environment. Read the following recommendations and select the ones you think would work best for you.

During Instruction or Activities

If you can't avoid being in an area with too much background noise, try wearing disconnected headphones or earplugs.

Working on Assignments or Independent Tasks

 $\ \ \square$ When you need a quiet place to study and learn, head to the library or a private room in your home.

Preparing for Tests or Presentations

Let your friends and family know that you need quiet in order to concentrate.

Traditional Setting

Physical Setting

Studies have shown that the physical setting of your learning environment has a direct effect on achievement. The traditional academic setting of straight-backed chair and formal desk doesn't work well for everyone. For some people, a casual setting with softer furnishings is more beneficial.

You prefer a casual setting while learning. You like to recline on a comfortable chair or sofa, or even on the floor, when you learn. You may even like to study while lying in bed. This helps you to concentrate and achieve better results.

Recommendations

Based on your results, you should try to study and learn in a casual setting with soft furnishings. Read the following recommendations and select the ones vou think would work best for you.

During Instruction or Activities

☐ If you can't avoid formal seating, sit on the floor while leaning against a

Working on Assignments or Independent Tasks

Sit on comfortable, soft seating or try reading while reclining on a bed or Use a laptop or other mobile device instead of a desktop computer.

Preparing for Tests or Presentations

Avoid sitting on a straight-backed chair and working at a desk or table.

Time of Day

Research has proven that success in learning can be affected by the time of day in which you study.

You have no strong preference for learning at a particular time of day. You are able to study and work equally well at any time, regardless of whether it is early or late.

Recommendations

Based on your results, you are able to study and work equally well at any time of day. Read the following recommendations and select the ones you think would work best for you.

During Instruction or Activities

Make sure you get enough sleep the night before class. Fatigue can hinder your ability to

Working on Assignments or Independent Tasks

☐ Build in blocks of time during the day for breaks and nutrition. You'll be more productive if you're well rested and eat properly.

Preparing for Tests or Presentations

▶ Be sure to make time for rest. If you neglect to get enough sleep, it could affect your performance on tests and presentations.

Not Very Accurate (50% or less)

Mindset Preferences

These preferences indicate your attitude toward learning and working, and how you function best. Mindset includes motivation, focus, how you complete tasks and how you work with others. For some of these preferences, developing your mindset toward one side of the scale is beneficial. For others, developing both sides of the scale is more helpful.

Low Teacher Motivation

High Teacher Motivation

Teacher Motivation

Teacher motivation indicates how much you are motivated by people like your teachers, counselors and other educators. Some students work hard because they know their teachers want them to. These students are helped when they can ask a lot of questions and get regular feedback. They also work better when their teachers are close by. Other students work better with less contact from their teachers.

You have moderate teacher motivation. Sometimes you are motivated by teachers and sometimes you are not. You may occasionally ask questions or try to get feedback from your teachers. If a teacher is nearby, it usually makes no difference in how well you work.

Recommendations

These recommendations are based on your results. Read them and select the ones you think would work best for you.

Always thank teachers for feedback and answers to questions. This will encourage more feedback in the
future.
Teachers are often very busy dealing with many students at once. If you want detailed feedback, or have more than one question, try to schedule a time outside of class to discuss things with your teacher.
When a teacher says something that sounds negative or critical remember that all feedback can belo you improve. The best way to react is to calm

ask a few questions about what to do next time. It might be best to wait a while after first receiving the feedback so that you have time to think and

Working on Assignments or Independent Tasks

form good questions that will get a good response.

The next time you are given instructions, verbal or written, for a large assignment, think carefully about what you are going to do. Write down your plans in point form if it helps. Then describe or show your plans to the teacher well before the assignment is due. Teachers always appreciate well-thought-out questions like this.

Preparing for Tests or Presentations

_	If a teacher is not providing the feedback you need, try to get it from a counselor, another teacher or your parents.
	Find out if any of your teachers make their classrooms available for studying before or after school. Or, you may be able to use the school library. This will make a teacher available if any questions come up while you are working.

Independent

Collaborative or Independent

essay test instead of multiple choice.

Being collaborative means working well with others. Being independent means working well on your own. If you prefer to work collaboratively, you tend to work harder and learn more with others, especially other collaborative people. If you prefer to work independently, you learn more and get more done on your own.

You have very high preference for collaboration. You are usually able to learn better and get work done with other people around and prefer not to work independently. Being able to work well under both conditions is important. Sometimes you need to collaborate and sometimes you need to be independent. This is true for school, work and your personal life.

Recommendations

Because it is important to be able to work both collaboratively and independently, there are recommendations for both. Read them and select the ones you think would work best for you in different situations.

During Ins	truction or Activities
	efer independence, try to sit in a part of the classroom where others are also independent and less likely to interact with you. However, some ivities will require you to collaborate with others. Be ready for those times.
If you ha people.	ve to work independently for long periods, take a break and use it to spend time with other
Working o	n Assignments or Independent Tasks
	efer to work independently, plan to do your more difficult work when you're alone. However, you can learn important things from others. You not to check in with others occasionally to talk about your work.
If you projects.	efer collaboration, organize a group to work together on
In choos indepen	ing a career or other activities outside of school, choose those that fit best with your preference for working with others or dently.
Preparing:	for Tests or Presentations

To study knowled	rin a collaborative way, study in places where there are people around to discuss ideas. Test each other on your Ige.
	Less Structure More Structure
Structu	re
	ho prefer more structure like to learn with step-by-step instructions for how to complete tasks. They want to know details of what resources to nave specific guidelines and examples of what their completed work should look like.
	o prefer less structure like to learn through exploration. They prefer to make their own choices about what steps to take, what resources to use equence to follow. They don't need examples of what their work should look like because they like to imagine their own way of doing things.
You probab	low preference for structure. You like to work out most of the details for assignments yourself and not be too restricted by specific guidelines. ly like to take an exploratory approach to learning, covering topics as they come up rather than sticking to a certain order. That kind of nee is good, as long as you cover everything that is required.
Recomme	endations
These recon	nmendations are based on your results. Read them and select the ones you think would work best for you.
If you fee	truction or Activities el there are too many steps to follow and are finding it frustrating, remember that some things must be done according to specific rules— taking a driver's test, filling out college applications, and going through airport security. Following instructions now will prepare you for life ke these.
☐ If you wo	n Assignments or Independent Tasks ould like to do an assignment differently, talk to your teacher. There may be room for some flexibility, as long as you cover the main objectives signment.
Even the assignm	ough you prefer less structure and enjoy the freedom to be creative, be sure to follow the guidelines for ents.
1 3	for Tests or Presentations of for tests can be done by exploring the information, but make sure you have covered all the areas that will be

Ask if you have the option to take tests that allow you to demonstrate what you know in a less structured way. For example, you may be able to do an

Focus

Focus refers to whether a person tends to complete all the work or tasks they need to do before doing other things. People with low focus may have many unfinished activities going on at the same time, while people with high focus complete a task before moving on to the next one. Focus is also related to whether you remain on-task and get things done on time or you tend to get distracted and procrastinate.

Your current results show that you have a moderate level of focus. Sometimes you get distracted and barely finish your assignments on time. You can increase your level of focus and improve your chances of success at school, in your career and in your personal life. Follow the recommendations below as a start

Recommendations

	think would work best for you

During Instruction or Activities

Remove any distracting objects or materials from your desk. If you get distracted by other people, try to sit away from those people during times that you need to focus.

Working on Assignments or Independent Tasks

Į	write dowr	i your goa	is and tasks.	keep that iis	L close by and	a visible so i	nat it is nar	a to
	forget.							

Use reminder features on your mobile device or computer to regularly remind you of your current tasks

Divide tasks into steps. Start assignments as soon as you get them — don't wait. You can take breaks, but make sure that you stay on track for completing assignments on time.

Don't work on too many projects at once. Prioritize the tasks from most to least important. Complete the most important one first and then move on to the next.

Preparing for Tests or Presentations

For important tests, make a study schedule. Figure out how much study time you will need based on the test. Then think of how much time each day you will have available to study. Work backwards from the test day to figure out how long before the test you will need to start studying.

Low Self-Motivation

🖍 High Self-Motivation

Self-Motivation

Self-motivation is important for doing well in school and in your career. Students with high self-motivation look for and find interesting things in their studies. It is easier for them to spend the time necessary to learn what they need to learn. They motivate *themselves* to learn. Students with low self-motivation usually need rewards or other people to help motivate them.

Your results show that you have high self-motivation. That's great! This means that you are great at finding interesting things in what you learn at school, which makes it easier to study and complete your work. Keep developing your self-motivation so that you can continue to find enjoyment at school and beyond. Follow the recommendations below as a start.

Recommendations

These recommendations are based on your results. Read them and select the ones you think would work best for you.

During Instruction or Activities

Talk with a counselor or teacher to find out what motivates you outside of school. Together, find the connections between those motivators and things you do in school. There may be specific classes, school clubs or teams that are a better fit with what motivates you.

Look at this chart to see how your education affects employment and pay. Notice how unemployment goes down and pay goes up as you gain more education.

Working on Assignments or Independent Tasks

Divide assignments and learning material into small parts and reward yourself for completing each piece. Take frequent breaks if it helps.

When given an assignment, talk to your teacher about how you could modify the assignment to fit with what motivates you. For example, if you like movies, you may be able to create a movie that covers the topics of your assignment.

Preparing for Tests or Presentations

Talk to a peer tutor. Peer tutors can be very helpful in pointing out what might be interesting or meaningful in school because they, as peers, are more likely to share your interests and values.

Everybody's motivation can be affected by challenges sometimes. If this happens to you, talk to a school counselor who is trained to help with this. You can also talk to others who have experienced similar challenges. Pick someone who was successful in overcoming that challenge and seems more motivated now.
