

LETTER OF RECOMMENDATION

When **Abhimanyu** asked me to write a letter of recommendation for him, I felt absolutely no hesitation in doing so. I have known him for the past two years, during which time I have taught him **Mathematics**, at Delhi Public School, Rohini.

Abhimanyu has been a very intelligent and astute student of his class. His sharp and clear reasoning has always made it easier for him to work on this subject. I have known him to work by analyzing the problem and understanding the dynamics of the formulae, which is an intrinsic part for doing well in Mathematics.

He has been a very punctual and consistent student throughout in the class completing all his assignments and work with an unmatched zeal and fervor. He has consistently been performing extremely well in the subject to be amongst the topmost students of the class. He has always attained impressive scores in the subject of Mathematics.

He has a very clear and methodical mind and accomplishes all his coursework with a clarity and punctuality that is indeed remarkable. His grasping of the subject is worth mentioning as is his meticulous way of dealing with the subject, which inspires his peers and motivates all to perform well.

He has been performing extremely well in other activities in school as well. He took part in the National Math Olympiad 2002, and was a recipient of the participation certificate. He has time and again proved his devotion to whatever he wants to accomplish and has impressed me with his perseverance and zeal to realize his goals.

Abhimanyu's ambition of studying at your revered university has been a longstanding one. An education at your institution, where he will avail of the best of infrastructure and a learned faculty, will definitely prove to be a feather in his cap of success.

Apart from all this Abhimanyu is also actively involved in the welfare of poor and the underprivileged. He has not only been involved in teaching the adult people under the Old Age Education system. Not only this he has also been actively involved in cleaning up the slums and helping them in making their living areas better than before.

I once again reiterate my recommendation for Abhimanyu Singh.

Name:

Designation: Mathematics Teacher
