To Whom It may concern :

I am writing this recommendation letter in the capacity of Math faculty member in FIITJEE Junior college for Rohan RatanKoduri to apply in your university for under graduation program.

I have known Rohan over the past two years as his Math faculty member. Since his enrollment in the high school, he has tirelessly worked to achieve good grades. He has been improving his grades since his first year. He takes the initiative to work on the concepts that he fails to understand in the class. He used to take extra lessons from me to understand the concepts. I admire the way he works sincerely. He works to gain expertise in the concepts already discussed in the class rather than concentrating upon earning high scores but in this process, he acquires good grades. He has been consistently improving his grades in Mathematics 2A and 2B respectively. His love for Mathematical theorems' is very encouraging for any teacher who would teach him or hold a discussion with him. I have also discovered him to be passionate about learning about different things to enhance his knowledge and very enthusiastic to participate in the class activities. Trigonometry, Integration, Binomial theorem and partial fractions are his favorite topics. He used to enjoy the work sessions whenever I held any discussion on these topics.

He is a fun-loving boy with an amicable nature. As his faculty member, I am deeply impressed with the way he goes out of his way to help his friends and peers. His peers depend on him for a number of favors academically and socially. He is very patient with each and every friend whoever approaches him. Hailing from an aristocratic family background, he never shows his airs. I wish him all the best for his future.

A well-disciplined energetic young teenager with a good upbringing is all set to fulfill his ambition, Rohan deserves my recommendation. Thus, I would unqualifiedly recommend him for admission into your program at your university. You are free to contact me at +919347663242 or by mail at gkameshwararao1@gmail.com for any additional information you might need in the admission process.

Sincerely admitted,

G. Kameshwar Rao
Professor,
Department of Math
