

Economics:

The study of Economics provides a good opportunity to gain an edge in today's rapidly globalizing world. Well-trained economists are in huge demand across industries, not only at the national but at the international level as well. In recent years, there has been a sudden rise in the demand for economic analysts, researchers and consultants as they are well-equipped and trained to effectively handle the increasing complexities of a rapidly globalizing and competitive society.

Therefore, the students of Economics are provided with deep insights into how an economy functions at the macro-level and how the markets operate at the micro-level. In addition, sufficient grounding into statistical and mathematical methods for economics, econometrics, public finance, monetary economics, international economics, development economics and economic policy-making are provided. All these are extremely desirable from the practical perspective of building a career whether in the public sector, private sector or even non-government organizations.
