

# **Your Personality**

## Your personality type is INTP:

# Introversion (I) vs. Extraversion (E)

How we interact with the world and where we direct our energy.

#### Introversion

- Focus attention inward
- Enjoy tasks that require concentration
- Work best on one project at a time
- Work at a careful, steady pace
- · Consider things fully before speaking

#### **Extraversion**

- Focus attention outward
- Enjoy a variety of tasks
- Seek out and need other people
- Work at a rapid pace
- Need to talk through their ideas

# Sensing (S) vs iNtuition (N)

What kind of information we naturally focus on and remember.

#### Sensing

- Focus on "what is"
- Like working with what can be seen and touched
- Apply past experience to solving problems
- Need specific and realistic directions

#### **iNtuition**

- Focus on "what could be"
- Enjoy theory and speculation
- Like thinking about the future and possibilities
- Need to use their imagination

# Thinking (T) vs. Feeling (F)

Make decisions logically and impersonally, or use personal values.

## **Thinking**

- Are motivated by achievement
- Enjoy analyzing problems logically
- Make fair and unbiased decisions
- Need to weigh the pros and cons to make decisions
- Can be tough negotiators

#### **Feeling**

- Motivated by work that is meaningful
- Sensitive to how issues affect people
- Like helping others and being appreciated
- Need decisions to be congruent with their values
- Need to work in a friendly environment

# Judging (J) vs. Perceiving (P)

More structured (finalize decisions) or more spontaneous (keep options open).

#### **Judging**

- Enjoy work that allows them to make decisions
- Prefer a predictable work pattern and environment
- Work towards completing their responsibilities before relaxing
- Like to maintain control of their projects

## **Perceiving**

- Enjoy flexible and changing work situations
- Like to be able to respond to problems as they arise
- Are more satisfied with fewer rules and procedures
- Need to have fun in their work

## **Your Personality Profile**

You are independent, curious and creative. Quite private, you like time alone to think things through or explore subjects and projects that really interest you. You tend to have a very small cluster of close, trusted friends and rarely initiate social activities. You prefer to get the most out of a few high quality social activities than take part in many shorter gettogethers.

You may have a real passion for science or the arts and enjoy learning new things. Inventive and imaginative, you are an "architect of ideas". You make quick and insightful connections, and enjoy coming up with original solutions to problems. But you get bored quickly, dislike repetition, and may struggle to explain your ideas simply and clearly to other people.

You are a very logical person and tend to remain calm in most situations. Unfairness and inconsistency bother you, and other people's opinions rarely influence you. You speak your mind and your actions are more motivated by achievement than by trying to please others. Your family and closest friends may not know how much you care about them because you rarely express your feelings.

You easily see both sides of an issue and enjoy healthy debate. But your relaxed attitude about deadlines and neatness can present challenges for your timeliness or following through on commitments.

You described your profile as:

**Very Accurate** 

# Learning

| Strengths  Eager to learn  Enjoy complexity, theoretical concepts  Analytical  Independent thinker  Curious  Do non-required study to broaden knowledge and understanding  Skeptical   | Challenges  Dislike repetition  May get distracted  May procrastinate  Need to prioritize  May fear failure, obsess over perfection  Need space and time to process |  |  |
|--|---|--|--|
| Recommendations  |   |  |  |
| The following recommendations are based on your results best for you.  | Consider each and select the ones you think would work  |  |  |
| For Learning Activities  Naturally curious, you are driven to learn, explore and experiment. You are not limited by conventional thinking and like to challenge existing norms. You learn best by starting out with a broad view of an issue or idea and the theory behind it, then honing in on the details.  If bored with classroom repetition, ask if there are alternatives to cover the required learning outcomes or activities you can do to learn more about subjects of interest. Do research on your own to discover new topics or deepen your knowledge. Don't get so engrossed that you neglect your other schoolwork.  You set high standards for yourself and may spend too much time in the researching and planning stages of an assignment. You also tend to become so absorbed by a single aspect that you disregard other things that need to be done. This can cause you to miss due dates or leave work incomplete. Try breaking your assignments into stages and set deadlines for each. Also, review the assignment requirements and ensure your plans are realistic and feasible.  For assignments that are tedious or seem irrelevant, use the activities you enjoy outside of class for motivation. Remind yourself that completing assignments early will allow you to pursue other interests later, when your schoolwork is complete. You can also try to spark your curiosity by discussing the subject matter with peers or experts, or by reading up on related topics that are of more interest to you. |   |  |  |
|  | r field and programs with a good student-to-faculty ratio.<br>ellectual curiosity and develop your gifts for complex analysis                                       |  |  |
| Your ideal learning space is an intellectually rigorous er   | nvironment where you can learn independently or with a small surrounded by like-minded peers with whom you can discuss  |  |  |

When you need time to analyze and reflect on information or ideas, find a quiet spot away from others where you can concentrate. This might be a room at home or a quiet location in a public place such as a park or library.
 Accept that you can't be perfect at everything and don't be too hard on yourself. Select your priorities wisely. Allow more time for courses that you will use in future. For prerequisites that are necessary for graduation but otherwise of

no future relevance, do the best you can with the time you have available and make sure you pass.

# **Work and Productivity**

### **Recommendations**

The following recommendations are based on your results. Consider each and select the ones you think would work best for you.

### For Sending and Receiving Communication

| П | Look for ways to simplify communications, especially emails or other written forms. For example, use bullet points    |
|---|---|
|   | and highlight or bold items that require a response. Provide examples and be as specific as you can.                  |
|   | You can be relied upon to provide an honest, impartial opinion. Take care that you are nottoo direct, however, or you |
|   | could come across as condescending. Your tendency to point out flaws may be taken as scornful or negative. Be         |
|   | sensitive to the other person's feelings. Make sure your feedback is as positive and helpful as possible. Assess the  |
|   | person's reactions as you're speaking and adjust accordingly.   |
|   |   |

Remember that some people may not fully comprehend your ideas, which can leave them feeling lost or excluded. Work at expressing yourself and your concepts in a clear and interesting manner. Include additional detail that will help your audience better understand.

You may need time to assess, reflect and compose your thoughts before replying to someone. In conversation, you can use body language — through making eye contact, nodding or using a gesture — to indicate that you're forming a response. If using email, send a quick note back to acknowledge the question and let the person know you will respond in full as soon as you've had time to consider your reply.

Be receptive when others try to engage you in casual conversation. Exchanging a few pleasantries could provide an entry into a more interesting discussion about topics of personal interest.

# **Working with Others**

| Strengths                    |  |  |
|------------------------------|--|--|
| Not bothered by              |  |  |
| criticism                    |  |  |
| ☐ Unbiased                   |  |  |
| ☐ Adaptable                  |  |  |
| ☐ In-depth knowledge of many |  |  |

Remain calm in stressful situations

| Cr | iaiienges                                |
|----|--|
|    | May appear arrogant or dismissive        |
|    | Prone to note defects or inconsistencies |
|    | Uncomfortable with emotions              |
|    | Need to appreciate others' efforts       |
|    | May seem aloof                           |
|    | May resist authority or input from       |

### Recommendations

topics

The following recommendations are based on your results. Consider each and select the ones you think would work best for you.

others

### For Interacting with Others

| commitment, are too sensitive, or can't keep up with your theoretical or visionary insights. Everyone has competencies that can be of use. By recognizing the value of their skills and perspectives, you can come to appreciate everyone's input.   |
|--|
| Make a point of providing positive feedback to your team on a regular basis. You may not feel the need for feedback or to have your actions validated. However, some people are more productive if they are praised for their efforts.   |
| Take care not to alienate people by instantly rejecting suggestions that seem irrational. Listen carefully to what others have to say. Your problem-solving mind will be tempted to point out flaws and offer advice or solutions. Not everyone is looking for answers or more information, or wants to have an intellectual debate. They may just want to talk about their experiences. Remember to deal with the <i>people</i> as well as the ideas. |
| When asked for information, present it in a way that doesn't assume you are the expert. Try to view your teammates as equals and seek their input as well. Also, show your enthusiasm for a topic. That can help to generate more  |

If you're in a leadership position, use your strengths to empower and direct your team. Make a point of praising and encouraging each person and let them know you appreciate their efforts. For optimal results, you may find it

## For Filling a Role
