## Career Motivators

**Career Motivators**, in the simplest term, are factors that encourage one to perform better at work. It could be anything- Money, Respect, Creativity, Challenge, and Recognition.

Career Motivators may not be same for every person. To one person, money could be of higher priority, to another recognition. Hence, it is very important that one chooses his/her career that has areas of motivational factor. Career Motivators are an important element in choosing a career else one's career after a while may seem boring and uninteresting.

### EXAMPLE

- ✔ To a businessman, profits (money) could be the motivational factor whereas to a politician, seeing the nation's development is the motivational factor.
- ✔ Being in social work career will get you lots of respect from society when compared to being engineer. But being a social worker would mean travel and less comfortable life as one requires to fight and help downtrodden.
- ✔ Being an engineer would mean more stability but would not bag respect as that of social worker. So if you want your career to be more comfortable and predictable then being an engineer would be a better option than being a social worker.

### CHALLENGE

A job that throws difficult circumstances every now and then is the one that will keep you hooked to it. We often hear freshers saying - 'we are looking for a challenging job'. Such folks like jobs where they are required to raise the bar of their work quality regularly. And it is this (challenging) quality of the job that keeps them motivated.

### FREEDOM

A suitable job for you is the one that will not bind you in terms of time schedule and monitoring. Yes, it may sound a silly thing to ask for. But not all take their freedom for granted. A few of us want freedom, along with a paycheck, as an important criteria in choosing the job.

### INTEREST

A job that is of your interest is ideal for you as it will keep you at it, irrespective of hurdles and troubles. This probably is the most basic and natural career motivator. If one likes a job, one will do it well; irrespective of hurdles.

### Aptitude Report

It may be true that with hard work and determination, one can perform well in any field. However, having an aptitude for that field can make things much easier. But what is aptitude? In the simplest of terms, Aptitude is nothing but the natural ease of learning something. And if that is there, a career journey can become very easy. Hence, it becomes essential that you know your aptitude and choose a career.

For example, if your verbal communication skills are at VERY GOOD level, which means have high aptitude in that. However, your writing skills or your body language may be at average level or even below average. In such case you need to focus more on the low aptitude areas. This is the advantage of specifically identifying the problem areas. It reduces the amount of effort you need to put on your training for the improvements.
