

Intelligences and You

Linguistic

Linguistic Intelligence

Linguistic intelligence helps you to understand and use language properly in reading, writing, speaking, including sign language and Braille. It also affects vocabulary and the ability to understand and use humor, create pictures using words, notice language patterns, and recognize relationships between words. Linguistic intelligence is one of the main intelligences linked with succeeding in school.

| Strengths |
|-----------|
|-----------|

| Know how to use vocabulary, sentence structure, |
|--|
| grammar and spelling for clear communication |
| Easily remember word-based information |
| Good at learning new languages and other symbol systems, such as computer code and hieroglyphs |
| Use language creatively for such things as storytelling, writing, using humor and composing poetry |
| Can tailor communication style depending on topic, audience and purpose |

Famous People with Strong I inquistic Intelligence

| nguistic intemigence |
|--|
| William Shakespeare (author, playwright) |
| Barack Obama (lawyer, U.S. president) |
| Maya Angelou (poet, author) |
| Noam Chomsky (linguist, philosopher) |
| Jean-François Champollion (linguist who first deciphered Egyptian hieroglyphs) |

Challenges

| Have difficulty with grammar, vocabulary, reading, writing, new languages and word-based puzzles |
|--|
| Struggle with communication, creativity and memory for general facts |
| Avoid activities that involve reading, writing and speaking, especially when dealing with challenging material |
| Don't pick up on subtle forms of humor, such as irony, sarcasm and satire |
| Have trouble remembering things that are read or heard |

Top Careers for Linguistic Intelligence

- 1. Interpreters and Translators
- 2. Technical Writers
- 3. Lawyers
- 4. Political Scientists
- 5. Speech-Language Pathologists
- 6. Neuropsychologists and Clinical Neuropsychologists
- 7. Training and Development Specialists
- 8. Soil and Plant Scientists
- 9. Foreign Language and Literature Teachers, Postsecondary
- 10. English Language and Literature Teachers, Postsecondary

Existential Intelligence

Existential intelligence is the ability to see the big picture in everything - the relationships and connections, vastness and limitations, and how everything fits together. This intelligence is used in considering questions about our existence, such as purpose, life, death, and our place in the universe. NOTE: Existential Intelligence should not be confused with existentialism. Existentialism is an area of philosophy dealing with certain views on human existence. Philosophers who examine and promote existentialist theories would certainly use their existential intelligence. However, the intelligence can be applied to other areas as well.

| Strengths | Challenges |
|--|---|
| Summarize details to understand a larger concept — putting together the elements of a career plan or game strategy, for example | Not interested in exploring "deep" questions about life, death and the universe. Prefer questions that have clea and final answers |
| See things from different points of view — understanding others' cultures or values, or both sides of a debate, for example | Focus on immediate tasks and getting them done, rather than thinking about different possibilities and how things connect in a bigger way |
| Explore questions about human existence through study of philosophy, ethics, the arts, or religion and spirituality Connect different ideas to envision something new and creative | Difficulty understanding perspectives, values and opinions that differ from own Rely on repetition and memory techniques for learning rather than looking for ways to relate facts to a larger concept |
| Famous People with Strong Existential Intelligence | Top Careers for Existential Intelligence |
| Aristotle (philosopher, teacher) The Dalai Lama (spiritual leader) Deepak Chopra (doctor, speaker/author) Ralph W. Emerson (essayist, transcendentalist) Jane Addams (philosopher, activist) | Clergy Political Science Teachers, Postsecondary Sociologists Advanced Practice Psychiatric Nurses Training and Development Specialists Directors, Religious Activities and Education Sociology Teachers, Postsecondary Philosophy and Religion Teachers, Postsecondary Social Work Teachers, Postsecondary |
| | 10. History Teachers, Postsecondary |

Logical Intelligence

This intelligence includes the ability to reason inductively (make conclusions based on observations) and deductively (make conclusions based on hypotheses). This intelligence also involves finding relationships between abstract ideas (numbers, for example), recognizing logical sequences and patterns, recognizing problems and solving them. This intelligence is closely linked with being successful in school.

| Strengths | Challenges |
|---|---|
| Easily recognize number patterns and can make quick, accurate calculations | Struggle with abstract mathematical and logical concepts |
| Understand the relationship between cause and effect to predict how one thing can affect another | Poor problem-solving ability — don't know how to use or develop approaches for reaching the best solution |
| Can identify all the parts in a system and how they interact | Dislike activities involving puzzles, strategy, calculations or formulas |
| Analyze information to determine what is important versus what is not | Find it hard to categorize and organize things in a logical manner |
| Able to work with abstract concepts and use symbols to represent concrete ideas | Not inclined to experiment or form theories to explain things |
| Famous People with Strong Logical Intelligence | Top Careers for Logical Intelligence |
| Thomas Edison (inventor, businessman) | 1. Mathematical Technicians |
| Albert Einstein (physicist, humanitarian) | Operations Research Analysts |
| Florence Nightingale (nurse, statistician) | 3. Actuaries |
| Sherlock Holmes (fictional detective) | 4. Software Developers, Applications |
| Bill Gates (businessman, philanthropist) | 5. Mathematical Science Teachers, Postsecondary |
| | 6. Agricultural Engineers |
| | 7. Biomedical Engineers |
| | 8. Transportation Engineers |
| | 9. Manufacturing Engineering Technologists |
| | 10. Industrial-Organizational Psychologists |

Spatial

Spatial Intelligence

Spatial intelligence includes the ability to identify objects accurately, change and recreate images, and recognize how shapes and objects relate to each other. While this intelligence is typically applied through visual means, spatial intelligence does not only rely on vision. It can also be used through touch and sometimes even hearing.

| Strengths | Challenges |
|---|--|
| Able to visualize images — both real and imagined — with great clarity, and to picture how they would look when rotated or modified | Difficulty learning information that is visual (presented as images or diagrams) or tactile (presented through touch and handling objects) |
| Notice and remember visual details and tend to evaluate the design, symmetry or beauty of things □ Can work with shape, size, position and location to | Poor memory for visual details such as locations and what things look like; may also forget faces Dislike puzzles, mazes, building models and other |
| solve problems and design, arrange or build things Have a good sense of direction and can easily navigate | activities that require fitting pieces together Easily lose sense of direction and have trouble |
| through different environments, whether on foot, driving or traveling by air or on water | understanding and following maps, charts and diagrams |
| Can accurately visualize and estimate distances and measurements | Struggle to estimate distances and measurements, whether they are distances for travel or measurements for cooking recipes |
| Famous People with Strong Spatial Intelligence | Top Careers for Spatial Intelligence |
| Frank Lloyd Wright (architect, interior designer) | 1. Civil Drafters |
| Michelangelo (artist, engineer) | 2. Mechanical Drafters |
| Steven Spielberg (film director, video game designer) | 3. Computer Hardware Engineers |
| Vera Wang (fashion designer) Christopher Columbus (explorer, navigator) | 4. Agricultural Engineers |
| | 5. Commercial and Industrial Designers |
| | 6. Biomedical Engineers |
| | 7. Architecture Teachers, Postsecondary |
| | 8. Pilots, Ship |
| | 9. Architectural Drafters |
| | 10. Transportation Engineers |

Kinesthetic

Kinesthetic Intelligence

This intelligence provides you with the mind and body coordination needed to move your body and other objects. It influences small movements, such as using your fingers to play a musical instrument, and large movements, such as running and catching a ball. Kinesthetic intelligence also affects certain mental abilities such as visualizing and remembering complex movements.

| Strengths | Challenges |
|--|--|
| Have good balance and coordination when moving or being physically active | Avoid activities that require good coordination or complex movements |
| Good at hands-on activities, such as using tools and objects to build, create and repair | Not interested in playing competitive sports |
| Can analyze complex movements and the steps involved to identify problems and solutions | Do not use movement or physical precision for self- expression — through dance, painting or handmade |
| Use movement to express feelings and ideas — | crafts, for example |
| through gestures, body language, acting or dance, for example | Lack confidence when using tools and other physical objects to complete tasks |
| Have good reflexes — react quickly and instinctively | Unaware of own body language and may miss non- verbal cues from others |
| Famous People with Strong | Top Careers for Kinesthetic |

Naturalist

Naturalist Intelligence

Naturalist intelligence involves being able to recognize, appreciate and group different things in the environment: plants, animals, people, structures, weather patterns, landscapes and so on. It also allows one to see the connections between different parts of the environment, to easily recognize when environmental changes happen, and to understand what impacts those changes might have. People with a strong naturalist intelligence are typically viewed as being "in tune" with nature.

| Challenges |
|---|
| Difficulty identifying or grouping plants, animals and objects in the natural environment, as well as manufactured objects like cars and clothing |
| Don't notice similarities between seemingly different objects Unable to identify the sights and sounds of nature — birds and their songs, for example, or the appearance of plants, rocks or cloud formations Feel uncomfortable in a natural environment — may fear wild animals, dislike insects, sand and dirt, and miss urban conveniences Unaware of gradual shifts in the weather and the effects of factors such as temperature, humidity, wind and pressure Not concerned about environmental protection, pollution controls or water quality |
| Top Careers for Naturalist Intelligence |
| Hunters and Trappers Park Naturalists Sustainability Specialists Veterinarians Environmental Science Teachers, Postsecondary Animal Breeders Farmworkers, Farm, Ranch, and Aquacultural Animals Environmental Science and Protection Technicians, Including Health Forest and Conservation Workers Fishers and Related Fishing Workers |
| |

Intrapersonal Intelligence

Intrapersonal intelligence includes the ability to understand oneself -- emotions, fears, motivations, strengths and weaknesses. This intelligence allows you to reflect upon your own thinking and behavior, learn from that reflection, find ways for self-improvement, and build self-confidence.

| Strengtns | Challenges |
|---|---|
| Well aware of personal abilities, challenges, feelings and attitudes | Give little thought to personal goals and abilities when making decisions |
| Set realistic goals, able to focus and stay on track | Unaware of how mood, attitude and tone of voice can affect other people |
| In control of emotions, good at handling high-stress situations | Allow personal opinions to negatively affect decisions and interactions with others |
| Make decisions thoughtfully and carefullyEthical and objective, aware of how personal viewpoints can be biased or unfair | Set unrealistic goals and make limited progress, often giving up Don't understand how to recognize and manage own emotions |
| Famous People with Strong Intrapersonal Intelligence | Top Careers for Intrapersonal Intelligence |
| Confucius (philosopher, teacher) Sigmund Freud (neurologist, psychoanalyst) Mohandas Ghandi (lawyer, ideological leader) Helen Keller (speaker, author) Terry Fox (athlete, humanitarian) | Gaming Supervisors Judges, Magistrate Judges, and Magistrates Child, Family, and School Social Workers Chief Executives Education Administrators, Preschool and Childcare Center/Program Postmasters and Mail Superintendents Psychiatric Aides Producers Transportation Managers |
| | 10. Sales Managers |

Musical Intelligence

| creating melodies and rhythms. | |
|--|---|
| Strengths | Challenges |
| Enjoy a wide range of different types of music Use music to influence mood, build motivation and boost productivity Easily pick up on the beat or chords in music and recognize different instruments by their sounds | Enjoy only a few types of music Music has little effect on mood, motivation and emotions Difficulty identifying sounds of different musical instruments Not likely to notice or use tone that imparts meaning in |
| Notice and use different tones in speech to impart emotion, emphasis or meaning Sing well, can play one or more instruments and could easily learn another Readily recall tunes and lyrics, and can use music, rhythms and patterns to remember things | speech — for example, detecting and using sarcasm Do not sing well and would have trouble learning to play an instrument Do not remember melodies and lyrics of songs |
| Famous People with Strong Musical Intelligence | Top Careers for Musical Intelligence |
| Jennifer Lopez (musician, composer)Elvis Presley (singersongwriter) | Music Composers and Arrangers Art, Drama, and Music Teachers, Postsecondary Music Therapists |

How well does it match you?

Developing Your Intelligences

These are your superpowers -- use your strengths to improve in other areas.

Linguistic

Advice for Learning

- Underline, highlight, or write down any new or unfamiliar words you come across in your reading. Look up these words as soon as you can
- Take elective classes like creative writing, speech and debate, drama, computer programming and foreign languages. Outside of class, participate in linguistic-based activities, such as solving crossword puzzles, playing Scrabble with friends or using word game websites like Free Rice and WordPlays.com
- Read aloud. For example, read stories to a sibling, or volunteer to read to younger students or children at the library. This will improve your flow, pronunciation and confidence
- Before you begin reading a text, familiarize yourself with the goals and main concept of the chapter. This will help you to better grasp the new information
- Get involved with the school paper or media club. Enter poetry, essay, or speech and debate contests

Recommendations

The following recommendations are based on your results. Consider each and select the ones you think would work best for you.
 Practice using your linguistic skills at every opportunity — whether reading a book, writing an essay, sending an email, doing an interview or speaking to an audience
 Read a variety of high quality written works. This can improve your ability to understand and interpret different types of writing and the creative use of language. Ask your English teacher or a librarian to help you choose appropriate materials
 Expand your vocabulary when writing and speaking. Use a dictionary and thesaurus to help you identify new words to express what you want to say. Make sure you understand each word's definition and how to use it correctly in a sentence. If using it in a speech, learn the proper pronunciation
 Explore the subtleties of humor. For example, examine the use of irony, sarcasm and satire. Learn to enjoy different types of humor and practice being funny yourself

Linguistic and Kinesthetic Intelligences

- Research and write out a plan to guide your efforts and track your progress as you work towards your personal kinesthetic goals
- Read a book about an inspirational athlete. Books that provide a first-person view of what athletes call "flow" or being "in the zone" are especially helpful
- Learn sign language. In addition to exercising your linguistic skills, it requires a certain level of coordination. It will improve your arm and hand dexterity

Linguistic and Spatial Intelligences

- Read books and other materials that use descriptive imagery words that describe how things taste, feel, look, move, smell or sound, for example. Try to visualize a mental picture that provides the same level of accuracy as the words you are reading. Over time, increase the amount of detail in your mental pictures, adding color, depth and background
- Participate in scavenger hunts and geocaching events. Use word-based clues to help people reach the goal

Your moderate strengths can often be developed more easily than weaker areas.

Existential

Advice for Learning

- When learning something new, think about how the topic fits into the greater scheme of things. What role does it play? Why is it important? How is it relevant to you, your community or the world?
- Look for ways to connect new concepts to what you already know. Ask yourself, what other subjects or ideas are similar to this one? What larger themes or groups could this topic fit under?
- Think about multiple points of view. For example, consider how your feelings about fossil fuels might compare to those of an oilfield worker or an environmentalist. How about the views of people in other jobs or in other countries? Try to understand perspectives on all sides of an idea or issue

Recommendations

best for you.
 Talk to people who regularly explore deep topics, such as religious leaders, counselors, university professors or sociologists. Ask, respectfully, questions about life, why we exist and why the world works the way it does. Seek multiple sources to learn different points of view
 Be willing to question your own beliefs and to be open to new possibilities. You don't have to believe everything you hear! But through questioning and adding to what you know, you will gain a better understanding of yourself, others and the world around you
 Don't be disappointed if answers to your questions are unavailable or lead to more questions. Instead of trying to reach a final conclusion, your goal should be continual growth and maturity

The following recommendations are based on your results. Consider each and select the ones you think would work

Existential and Intrapersonal Intelligences

- When thinking about existential questions, try to focus on those that have a personal nature. For example, "What is my purpose in life?" and "What would I like to be remembered for?"
- When examining your personal motivations, try to reflect more specifically on your goals, relationships and feelings
- Be aware of your thoughts and productivity during class and other work times. Self-monitoring can help you remain on task and keep up with your responsibilities

Existential and Naturalist Intelligences

- Think about the complexities in nature. Note the individual details that make up your immediate surroundings and the world beyond. Does nature have goals, direction and purpose? What are our responsibilities? As you consider these questions, spend time in a natural environment to make observations and consider how each element is connected
- Get involved with a naturalist group. You can help the organization gain focus by gathering information from different sources to figure out overall strategies and policies. Spending time with the group will increase your appreciation for naturalist causes
- Study other societies to learn about the role of nature in religion and customs. Many cultures have a strong spiritual connection to nature

Logical

Advice for Learning

- Use and create information that can be represented in multiple ways. For example, data can be placed in a chart or graph. Outlines can be shown as a mind map
- To improve your critical thinking skills, learn about the "fallacies of logic" (incorrect arguments or reasoning). Practice identifying and creating statements that demonstrate fallacies
- Ask others to help you spot flaws in your problem solving and analytical strategies. When you watch someone else analyze a problem, focus on the process they use to solve it and ask questions about each step
- Look for patterns and ways to organize information to make it easier to remember. For example, you could order items alphabetically or create acronyms for the names of things

The following recommendations are based on your results. Consider each and select the ones you think would work

Recommendations

Try your skill at online puzzles. There are plenty of free websites available offering a variety of logic puzzles, riddles and unique math problems
 Use every opportunity to practice your math skills. For example, when leaving a tip at a restaurant, first try doing the calculation in your head, then on paper, then on a calculator. This will give you practice and allow you to check your answer
 Take a little time each week to read or watch a science-based article or story. Get to know some of the theories or facts in the story. Over the next few weeks, try to find real-world situations that relate to those concepts. For example, you can learn about RF radiation and how it is used to send signals to a cell phone
 Learn about common logical fallacies and how to avoid them. This can improve your reasoning skills and help you make more accurate conclusions, using reliable and unbiased information

Logical and Interpersonal Intelligences

- Get involved with school or local groups or online communities that engage in logical or mathematical activities
- Take psychology and other social science classes. Learn about the kinds of interactions to which people respond positively, and why
- Try massively multiplayer online games (MMOGs). In many of them, success is accomplished through a combination of logical strategy and interaction with others

Logical and Musical Intelligences

- Learn about the connections between music and math. Music is very much about patterns, sequences of notes and changes in vibration. Much of this can be analyzed and understood through logical and mathematical analysis
- When working on logical activities, listen to music that helps you focus. Baroque music, and taking part in formal musical training, have been shown to help with math and reasoning
- Learn basic note patterns in terms of pitch and length. Then select an instrument and experiment with the musical scales

Spatial

Advice for Learning

- When taking notes or studying, use mind maps, charts, diagrams or pictures to visualize the topics you are learning about. Create sketches or mental images to help you memorize and recall information
- Imagine different ways of seeing things. Visualize how they would look based on a description. Then think about how they would look if you rotated them, or changed a color, shape or other feature
- Take elective courses like art, marketing and advertising, dance, animation, video production, woodworking or design
- When permitted, incorporate visual representations into your assignments and projects. For example, you could make use of charts, posters, diagrams, animations or videos

Recommendations

The following recommendations are based on your results. Consider each and select the ones you think would work best for you.

| | Practice hands-on activities like completing jigsaw puzzles, designing clothes, working on engines, choreographing a |
|---|--|
| | dance routine or constructing woodwork projects. These activities encourage the use of multiple senses, such as |
| | vision, touch and hearing, to observe shape, distance and direction in a three-dimensional space. Paper and |
| | computer-based visual puzzles can also help, but rely solely on visual observation |
| П | Use visual presentations to communicate information. For example, create graphs and charts to represent numbers |
| | and statistics. Use flow charts and mind maps for studying and taking notes. When preparing for activities that |
| | involve movement, especially complex moves, visualize your actions before the activity |
| П | Practice thinking about composition — the way in which the elements of an image, work of art or other objects are |
| | arranged and work together. Photography, art and design courses are an excellent way to get started. Becoming |
| | more aware of compositional details can help you become better at understanding and creating visual information |

Spatial and Existential Intelligences

- Learn about cosmology, the study of the universe. As you delve into the topic, consider existential questions about the origin of the universe and its purpose
- Study the works of Michelangelo, Salvador Dali and Alberto Giacometti. Find out what inspired these artists and how their art addressed different existential questions

Spatial and Linguistic Intelligences

- When visualizing something, think of how you would describe it in words. Try to be as detailed and accurate with words as you are with your mental picture
- Improve your vocabulary by reading books and other materials that use descriptive imagery. For example, you could look for materials about nature, art, architecture, mechanics, engineering, graphic design, building trades, electronics or landscaping

Kinesthetic

Advice for Learning

- Actively use your body and your five senses to "learn by doing". Use hands-on activities, such as manipulating objects or conducting experiments, to learn new concepts. You remember information better when it is related to an activity
- Try to remain active when you're concentrating on learning something. For example, you could squeeze a stress ball while watching a presentation
- Take short breaks to get up and move around or stretch during class time
- Complete reports and other assignments by acting out skits or building models
- Get involved in coaching or assisting. This gives you the chance to design plays or routines, or to analyze and instruct on proper movement for the activity

Recommendations

best for you.
 When practicing a new movement, repeat it several times. This helps your nerves and muscles learn the proper patterns for the activity
 Think about your body's movement during an activity. Concentrate on how your limbs and muscles move when participating in swimming, martial arts, surfing, acting or dancing, for example
 Focus on the goals of each movement during an activity. Through repeated practice, your muscles will become trained to carry out the correct movements automatically. This will allow you to focus more on the overall goal, such as winning a race

The following recommendations are based on your results. Consider each and select the ones you think would work

Kinesthetic and Existential Intelligences

- Striving for excellence in coordinated movement can create a mental state that improves your ability to grasp existential topics. Learn about "flow state" and how it is achieved
- Take part in activities that have a spiritual nature, like yoga, tai chi and meditation. These types of exercises encourage reflection, as you consider the wider world beyond you

Kinesthetic and Linguistic Intelligences

- When writing or speaking, create more vivid pictures for your audience by using words that are body or actionoriented. For example, a person can be "gripped" with panic, experience "spine tingling" excitement or have "gutwrenching" anxiety
- Read a book about an inspirational athlete, especially one that provides a first-person view of what some athletes call flow or being "in the zone"

Naturalist

Advice for Learning

- Work on assignments in a natural environment that helps you focus in your backyard, for example, or at a park or beach
- Take part in school field trips. In addition to outdoor experiences, go on trips to science museums, art galleries and other environments where you can use your senses to identify and classify objects
- Join or start an environmental project, at school or in your community

of their song, perfumes by their smell and fabrics by their texture

In class, look for ways to incorporate nature and the environment. For example, you could write a paper about how
weather conditions have affected worldwide events

Recommendations

The following recommendations are based on your results. Consider each and select the ones you think would work best for you.
 Spend time in a natural environment. Pay attention to the animals, plants and other objects around you, noting the differences and similarities. Imagine how each living thing fits into its environment, and how the rocks and landscape were formed
 Practice grouping objects — both natural and non-living ones — according to their features. This is called categorization. Use multiple senses when categorizing objects. For example, you might identify birds by the sounds

Get involved in an environmental cause. You may initially decide to join an organization because you know people who are already involved or because there is a need for your skills. Whatever the reason, the important thing is that you gradually learn about and appreciate the cause itself

Naturalist and Existential Intelligences

- Think about the complexities in nature the many individual details that form the whole. Use your knowledge of the natural world to consider questions about the purpose and direction of nature, and our responsibilities to it
- Deepen your spiritual connection to nature. Take time alone in the natural environment to relax, observe and open your mind to what's around you. Think about why you feel happy or at peace in your favorite natural settings

Naturalist and Linguistic Intelligences

- Select an environment or cause that interests you, such as mountains, oceans, clean energy or wildlife preservation. Read books or articles or listen to presentations related to the topic. Examine the structure and word choice in these materials and think about how the ideas have been presented. Have the techniques been effective?
- As you become more comfortable with analyzing others' writing and speeches, try writing or speaking on naturalist topics yourself
- Join or start an environmental group. Get involved with producing newsletters, providing outreach services or assisting via other forms of communication

Intrapersonal

Advice for Learning

- Learn about and practice good decision making and setting realistic goals. Check your progress regularly
- Build awareness of your feelings, attitudes and behavior. Keep a journal or blog and record your thoughts about your experiences at school. Later, review and reflect on what you've written. Try to analyze your thoughts objectively
- When receiving corrective criticism, remind yourself that feedback is intended to help you improve your skills. It's not meant to judge you as a person
- Monitor and manage negative emotions. If you notice yourself feeling frustrated, angry or upset, take a mental "time
 out". A brief pause to step back from the situation, calm down and gather your thoughts, even if just for a few
 seconds, can help you regain control

Recommendations

| | S , |
|----|--|
| be | est for you. |
| | Spend time on yourself. Understanding your own feelings can help you sympathize and empathize with others, to appreciate what they feel. It can also help you feel more energized, self-confident and focused |
| | Take time to reflect. Consider your thoughts, feelings and behaviors. What actions have brought you success and what you would like to change in the future? You may want to try meditation, self-help books or courses that can help with self-analysis |
| | Set specific, realistic goals. Make sure they range from short-term to long-term and easy to more difficult. As you achieve them and your confidence increases, take on greater challenges |
| | Practice being self-aware. Try to predict how your actions — or inactions — will affect you, and other people, in future |

The following recommendations are based on your results. Consider each and select the ones you think would work

Intrapersonal and Existential Intelligences

- Use your deep sense of self-awareness to tackle tough questions about existence. Try reflecting on questions of a personal nature, such as "What is my purpose in life?" and "How do I want to be remembered what difference will I make to my community or the world at large?"
- Consider general existential questions that are not necessarily centered on you. Talk to others about their thoughts and attitudes

Intrapersonal and Linguistic Intelligences

- Read more. You may enjoy self-help books or other motivational and psychology-based books
- In a blog or journal, start with what you know and write about yourself your thoughts and feelings, for example. Examine what you have written and think about how you could improve it. You can also ask for feedback from a teacher, counselor or anyone else you trust to provide good advice
- After some inner reflection, express your thoughts in poetry or creative writing

You may find these areas more challenging -- you can develop them using your strengths.

Musical

Advice for Learning

- Take speech and debate, poetry or creative writing class. Pay attention to the rhythm and patterns in speech and writing. Try reading and writing different things with varying paces and different tone
- When working on assignments, playing sports or working with your hands, try to move and work with a rhythm that suits the activity
- Take a drama class and learn how actors use tone and rhythm to convey more meaning than words alone can do
- If permitted, include music in your presentations or projects. Be sure to select music that complements your assignment. Don't just pick your current favorites, unless they are relevant!

Recommendations

| e following recommendations are based on your results. Consider each and select the ones you think would work st for you. |
|---|
| Listen carefully to music. Try to identify different instruments or tracks, and follow the rhythm and pitch for each |
| Play games that center around making music. There are many games that allow you dance, sing or play a simulated instrument to popular music |
| Learn to create music. Try singing along to music at first, then afterwards on your own. Or, try playing along to music and then on your own. There are many websites and YouTube videos that provide step-by-step instructions for different instruments and popular songs |
| Use background sound to focus. Try listening to different types of music during an activity to learn which ones work best for you. You may also find that silence, or white noise, in the background works best at times |

Musical and Existential Intelligences

- When listening to music, try to determine the overall theme of a song, or even a whole album. Think of why certain sounds and rhythms were used, and how they relate to the theme
- Think about why music exists. What is its historical basis? What purpose does it serve? These questions may lead to deeper questions that are unrelated to music. Explore those questions as well
- Consider music in different cultures. Think about how people use music from hymns to chants to drumming to explore existential questions and responses

Musical and Linguistic Intelligences

- Read books about music or musicians. Or, read song lyrics without the music. Think about the techniques the writer
 has used. Consider word choice, sentence structure, and the way ideas are presented over each paragraph, chapter
 or the entire work
- Try writing lyrics to songs. Start by rewriting a favorite song with your own words. Then move on to create your own original material. You can also try writing poetry and putting it to music
- Take poetry and creative writing classes. Note the emphasis on rhythm and timing in these works. Read poetry aloud and listen for the cadence (the rhythmic flow) of the writing

Interpersonal

Advice for Learning

- Learn how to be a good listener. Practice "active listening" and use every conversation as an opportunity to better understand other people's points of view
- Talk to other students, teachers or experts to learn more about topics covered in class. Try to be prepared with good questions
- Ask your teacher about working in pairs or groups, or participating in projects with other classes, to encourage discussion. Outside of class, join or form a study group
- Get involved in a social cause that relates to a topic you're studying, or volunteer to mentor other students in a subject you know well
- Take part in role playing, presentations, debates and group activities

Recommendations

best for you.

There are many tools available — including books, courses, videos and websites — to help improve your relationship skills. Some are better than others, so be sure to select a good quality resource. If possible, try to get feedback or recommendations from people who have used that resource before

The following recommendations are based on your results. Consider each and select the ones you think would work

| Be observant. Pay attention to people's facial expressions and posture. Try to spend more time listening than talking |
|---|
| By being sensitive to others' perspectives, emotions and motives, you can adapt your response to what is needed $-$ |
| and provide support, encouragement, an opinion or advice, for example |

| Get involved in volunteering, mentoring or charity work. These activities can improve your ability to feel empathy, |
|---|
| understand others' points of view and build your communication skills |

| Expand your network. Interact with people of different ages, cultures and skil | Ш |
|--|---|
| sets | |

Interpersonal and Existential Intelligences

- Enhance your exploration of deeper subjects by interacting with people who are spiritual or philosophical. Conversations with them will likely lead to questions of an existential nature
- Read online forums that discuss existential topics. Try to understand the beliefs people are expressing and be sensitive to their views and feelings. If you contribute to the forum, always use caution and avoid providing personal details online

Interpersonal and Linguistic Intelligences

- Before sending a letter or email, review what you have written to see if you can improve the way you've expressed your message
- After sending written communication, ask for feedback on your message. Was it clear? Did it flow well? Seeking this feedback from linguistic individuals is particularly helpful
- Join a club or get together with friends to talk about your favorite books or other written material. Listen to how the others analyze what they've read. Ask questions when you want clarification

Emotional Intelligence (EI)

0-0-0-0

Emotional Intelligence and You

Emotional intelligence (EI) is your ability to recognize and manage your feelings and behavior, and those of other people, in a way that helps you.

Most Recent Results

Your El score is a blend of your interpersonal and intrapersonal intelligences scores. El relates closely to these two intelligences.

Your results indicate that emotional intelligence is likely a challenge for you. You may find it difficult to judge what others are thinking or feeling. At times, you may not realize that your mood is affecting your thoughts. You may also find it difficult to describe how you are feeling or to convince others to go along with your ideas. Don't worry, though. These are all things that can be learned and enhanced. The information in this section will help you develop your emotional intelligence.

Emotional Intelligence Traits

Read the list of traits related to EI and indicate the degree to which each is a strength or challenge for you. Be sure to update this list as you develop challenges into strengths.

| Adaptable: able to deal with new and changing conditions | OOOO OCCHallenge Strength |
|---|---------------------------|
| Assertive: honest, direct and willing to stand up for yourself | OOOO OCC Strength |
| Composed: think carefully before reacting and resist being impulsive | Challenge Strength |
| Content: happy and satisfied with your life | Challenge Strength |
| Empathic: intensely aware of needs and feelings — your own, and other people's | Challenge Strength |
| Expressive: can communicate your emotions to others in a healthy way | OOOO OCC Strength |
| Influential: can guide other's emotions in a purposeful way | Challenge Strength |
| | |

Intimate: build and maintain healthy and close personal relationships

| Optimistic: have a positive outlook on life | Challenge Strength |
|---|---|
| Perceptive: keenly aware of your emotions and those of other people | OOOO OCCHAllenge Strength |
| Regulated: able to manage your emotions and behavior in a variety of situations | OOOO OCC Strength |
| Resilient: can deal with pressure and stress in a healthy way | Challenge Strength |
| Motivated: persist and overcome difficulties to achieve goals | Challenge Strength |
| Connected: build social connections with many different people | Challenge Strength |
| Recommendations The following recommendations are based on your results. Select the one | es you think would work best for you. |
| Developing Emotional Intelligence | |
| Develop a sense of humor and try to make people laugh without putti down | ng others |
| Learn to laugh at yourself and endear yourself to others by showing humility | |
| Write out your thoughts and create a plan for self-improvement. Make accomplish in the next year | e a list of goals, from easy to difficult, to |
| Volunteer to help others. This is especially effective if you are able to in as at a hospital, homeless shelter, or retirement center | teract directly with those you are helping, such |
| Participate regularly in healthy activities that provide stress relief. Som music, playing with a pet or talking with a close friend | e examples include meditation, exercise, |
| Take responsibility for your problems or difficulties. While it is easy to of solution. Choose one difficulty you're currently dealing with and figure yourself | |
| Learn to say No when you mean it. When you say Yes out of guilt, or M problems than you solve in that moment. There is no need to be mear can realistically accomplish | |
| Practice being grateful. While it is important to take responsibility for a yourself of the good things in your life. Once a week, write down what | makes you thankful. Record it in the same |
| place each time, so you can easily review the things you were grateful | • |
| Move outside of your own perspective. When you are critical of other people's backgrounds and about cultures that differ from your own. Pequestions respectfully, with the goal of learning about others' views, in | y feel the way they do. Learn more about ractice listening more than speaking. Ask |

Career and Pathways
