

Your Personality

Your personality type is INTJ:

Introversion (I) vs. Extraversion (E)

How we interact with the world and where we direct our energy.

Introversion

- Focus attention inward
- Enjoy tasks that require concentration
- Work best on one project at a time
- Work at a careful, steady pace
- Consider things fully before speaking

Extraversion

- Focus attention outward
- Enjoy a variety of tasks
- Seek out and need other people
- Work at a rapid pace
- Need to talk through their ideas

Sensing (S) vs iNtuition (N)

What kind of information we naturally focus on and remember.

Sensing

- Focus on "what is"
- Like working with what can be seen and touched
- Apply past experience to solving problems
- Need specific and realistic directions

iNtuition

- Focus on "what could be"
- Enjoy theory and speculation
- Like thinking about the future and possibilities
- Need to use their imagination

Thinking (T) vs. Feeling (F)

Make decisions logically and impersonally, or use personal values.

Thinking

- Are motivated by achievement
- Enjoy analyzing problems logically
- Make fair and unbiased decisions
- Need to weigh the pros and cons to make decisions
- Can be tough negotiators

Feeling

- Motivated by work that is meaningful
- Sensitive to how issues affect people
- Like helping others and being appreciated
- Need decisions to be congruent with their values
- Need to work in a friendly environment

Judging (J) vs. Perceiving (P)

More structured (finalize decisions) or more spontaneous (keep options open).

Judging

- Enjoy work that allows them to make decisions
- Prefer a predictable work pattern and environment
- Work towards completing their responsibilities before relaxing
- Like to maintain control of their projects

Perceiving

- Enjoy flexible and changing work situations
- Like to be able to respond to problems as they arise
- Are more satisfied with fewer rules and procedures
- Need to have fun in their work

Your Personality Profile

Logical, creative and clever, you are confident in your ideas and in your ability to meet or exceed your goals. Ambitious in everything you do, you are driven to be competent and original. You have a keen sense of what is possible and a global perspective. An excellent strategic thinker, you look beyond what is known to see connections between elements that are often very different.

You tend to be a perfectionist. You are critical and demanding of yourself and undaunted by opposition. Focused and determined to bring your vision to life, you will work tirelessly to produce a flawless idea or product. You tend to be much more interested in meeting or surpassing your own high standards than trying to please others.

You are such a complex thinker that your ideas are sometimes too complicated for others to follow. You may struggle to express yourself simply and can become irritated when people are slow to catch on. You can be harshly critical and may neglect to show appreciation or encouragement to those around you. You need to realize the importance of others' feelings.

Extremely independent, you will defend your position and stubbornly refuse to concede, even if others disagree. Only a sound and well-reasoned argument is likely to convince you to change your mind. You are controlled and keep your emotions in check, and generally don't like it when people overreact.

You are most interested in acting on your own ideas and concepts of the future, but may miss key, practical requirements in your plans that can render them unworkable. You are reluctant to share the details of a plan with others at an earlier stage in the process, because you are still refining it. However, this puts you at risk for completing a project before a critical error is noticed.

You described your profile as:

Learning

Strengths

complete	overconfident
Objective	
₩ High standards	☐ Intolerant of fixed processes and procedures

Recommendations

The following recommendations are based on your results. Consider each and select the ones you think would work best for you.

Your Preferred Environment

- Exercises your ability to make sense of complex theories and apply it to evaluating problems and devising creative solutions.
- Gives you plenty of time and scope for strategic thinking, conducting research and trying out your ideas. You thrive on intellectual challenge and originality, and are not easily deterred. You will work tirelessly to see your ideas through to their conclusion.
- Acknowledges your achievements, compensates you appropriately, and provides plenty of opportunities to display your mastery and to progress in your career.
- Allows you to be largely self-directed, with lots of control over your tasks, projects and standards. You work best independently or with a small, trusted group of capable colleagues, in an environment that doesn't include too many requirements or restrictions.

For Growth and Development

- Set realistic goals that are possible to achieve. If your standards are too high, the project is impractical or you haven't thought it through well enough, it may not be feasible. Use your intuition to thoroughly critique your ideas.
- Make an effort to include others' input on your proposals, and to involve people earlier in the process. Because you are so confident and have put so much thought into an idea already, you may tend to ignore suggestions. Also, once you've come to a conclusion, you'd rather not have to deal with conflicting views. However, this excludes others from contributing and leaves you open to the risk of missing important details. Be sure to keep people informed and involved throughout a project. Ask others for their ideas and consider them equally alongside your own.
- If you're having trouble figuring out a solution to a problem and are growing frustrated, take a break and focus on something completely different. Sometimes your best ideas come to you when you are concentrating on something else.
- While you may prefer to do all the work yourself, take advantage of the expertise around you. Be willing to delegate tasks to others whose interests or skillsets are stronger than yours in certain areas. For example, if you find detail work or repetitive tasks unappealing, see if you can hand them off to a colleague who excels in and enjoys such work.

Communication

topics of personal interest.

Working with Others

Strengths	Challenges
☐ Organized	
	Private
☐ Open to	☐ Critical
criticism	Oblivious
Strong opinions	Can seem intimidating
✓ Willing to ask tough questions	Hold others to own high standards

Recommendations

The following recommendations are based on your results. Consider each and select the ones you think would work best for you.

For Interacting with Others

You are very independent and may not particularly feel the need to collaborate with others. However, teamwork can
be beneficial. It provides a venue for you to showcase your talents and have your achievements recognized. If you
aspire to be a leader, it's a chance to demonstrate your potential and practice building strong working relationships
with your colleagues.

- Be willing to delegate tasks that don't require your attention. Just as your skills are vital in certain situations, so too are the skills of others. Learn about your teammates' unique competencies and find ways to make the best use of them. This helps to keep everyone satisfied, involved and making the best use of their talents.
- Consult with others, ask for feedback and take care not to alienate people by instantly rejecting their suggestions. Listen carefully to what they have to say. You tend to be more focused on results than relationships, and your problem-solving mind may be tempted to point out flaws. Remember to deal with the *people* as well as the ideas.
- You may become frustrated with people you consider incompetent, who don't understand your ideas or don't meet your standards. In highly stressful situations, you may even lash out at them. Remind yourself that people have feelings. Learn how to connect with them so that you can better understand their outlook and motivations. Think about how your words can affect others and how you could show more consideration.
- Try to express enthusiasm. While you may have a great deal of fervor for something, it doesn't always translate into a passionate interest to those around you. Enthusiasm in a group can grow and help to achieve amazing things.
- If you're in a leadership position, make a point of letting your team members know they're doing a good job and that you appreciate their efforts. With your focus on finding solutions and reaching goals, you may be unaware of the need to also pay attention to people's needs and feelings.

For Filling a Role

V	Originator: developing new ideas, perspectives and solutions, predicting and strategizing for what is to come, and
	creating a long-term vision.

- **Director**: organizing goals, identifying and gathering suitable resources, and ensuring everyone understands and carries out their responsibilities.
- Analyzer: examining, testing, understanding and defining in order to explain things and solve problems.
