#### **Your Personality Profile**

Quiet and independent, you like to keep busy with projects that are of importance and interest to you. You value skills and quality performance in yourself and others. You are reserved and private, and not usually inclined to share your reactions or opinions.

Straightforward and honest, you are less interested in conversation than action, unless you are especially knowledgeable about the topic of discussion. Unpretentious and down-to-earth, you are more curious and impulsive than planned and organized.

You are comfortable with theory, but prefer working with real things rather than abstract ideas. You are realistic, good at logical analysis and usually able to understand how things work. A keen observer, you trust facts gained through personal experience. Spontaneous and easygoing, you are attracted to fun or physical activities, especially those that take place outdoors or contain a level of risk or excitement.

Intensely private, you rarely share your feelings or emotions with others. In fact, you may not consider this aspect of life to be particularly important. Naturally reserved, you may be viewed by others as aloof or cold, especially if you don't bother to explain your behavior. This can be frustrating and hurtful to loved ones and may hinder your ability to develop emotionally.

You are generally relaxed and casual and don't like a lot of rules, structure or restrictions. Your need for thrills can cause you to take unnecessary risks and sometimes evade your responsibilities. Because you hate to be bored and are easily distracted, you may not always follow through with commitments. You are likely to dispense with the planning or organizing aspects of projects and get straight to the parts which are more fun or at which you are already proficient.
