

Your Personality

Your personality type is ENTP:

Introversion (I) vs. Extraversion (E)

How we interact with the world and where we direct our energy.

Introversion

- Focus attention inward
- Enjoy tasks that require concentration
- Work best on one project at a time
- Work at a careful, steady pace
- Consider things fully before speaking

Extraversion

- Focus attention outward
- Enjoy a variety of tasks
- Seek out and need other people
- Work at a rapid pace
- Need to talk through their ideas

Sensing (S) vs iNtuition (N)

What kind of information we naturally focus on and remember.

Sensing

- Focus on "what is"
- Like working with what can be seen and touched
- Apply past experience to solving problems
- Need specific and realistic directions

iNtuition

- Focus on "what could be"
- Enjoy theory and speculation
- Like thinking about the future and possibilities
- Need to use their imagination

Thinking (T) vs. Feeling (F)

Make decisions logically and impersonally, or use personal values.

Thinking

- Are motivated by achievement
- Enjoy analyzing problems logically
- Make fair and unbiased decisions
- Need to weigh the pros and cons to make decisions
- Can be tough negotiators

Feeling

- Motivated by work that is meaningful
- Sensitive to how issues affect people
- Like helping others and being appreciated
- Need decisions to be congruent with their values
- Need to work in a friendly environment

Judging (J) vs. Perceiving (P)

More structured (finalize decisions) or more spontaneous (keep options open).

Judging

- Enjoy work that allows them to make decisions
- Prefer a predictable work pattern and environment
- Work towards completing their responsibilities before relaxing
- Like to maintain control of their projects

Perceiving

- Enjoy flexible and changing work situations
- Like to be able to respond to problems as they arise
- Are more satisfied with fewer rules and procedures
- Need to have fun in their work

Your Personality Profile

You are friendly, creative and confident. You have lots of friends and acquaintances and are pretty easy to get to know. You love to talk and be in the spotlight. You especially enjoy entertaining others with your engaging stories, wit and unusual sense of humor.

You have little trouble adapting to change. You pride yourself on your creativity and ability to see possibilities where other people can't. You grasp new ideas quickly and enjoy learning. However, you are easily distracted and tend to get bored as soon as the challenge in a project is over.

While you are easygoing and playful, it is often a struggle to make decisions or commit to one plan of action for an extended period of time. This is because you are so curious and eager to experience as much of life as you can.

You are also very logical, and bothered by inconsistencies and unfairness. You love a spirited debate, regardless of the topic, but can sometimes be argumentative. Your spontaneity and enthusiasm are infectious, and other people often want to follow your lead.

Since you like starting things much more than you enjoy finishing them, you often have trouble slowing down, preparing carefully, and following through with your commitments. Luckily you are great at improvising and get a real sense of excitement from accomplishing things at the last minute.

You are also an excellent negotiator. You can usually convince or charm other people into letting you have your way — or give you one more chance!

You described your profile as:

Learning

Strengths	Challenges
 Creative Deeply curious Connect different ideas and topics easily Good with theory, quickly recognize patterns or similarities Want to impress others with knowledge Do well on assignments with less structure 	Challenges ☐ Require difficult, stimulating material ☐ Need variety, easily bored ☐ Resist highly structured learning environments or projects ☐ Dislike convention, rules and routine ☐ Difficulty learning alone ☐ May procrastinate
Enjoy debate, challengesLearn well with others	

Recommendations

The following recommendations are based on your results. Consider each and select the ones you think would work best for you.

For Learning Activities

come across as too forceful or aggressive.

Intrigued by complexity and possibilities, you like to immerse yourself in developing new ideas and creative problem solving. You learn best by starting out with a broad view of an idea and the reasoning behind it, then exploring it
further by analyzing, asking questions and discussing it with others.
You don't like to be limited by rules or tradition and enjoy challenging existing ways of doing things. Ask your instructor if you can use different methods to reach the required learning outcomes. Be prepared to suggest some
alternatives. For example, perhaps you could complete an assignment by creating a presentation instead of writing a paper. If a specific method is required, ask for the reasons why. A logical explanation that makes sense to you can help to make it more acceptable.
With many interests, ideas and projects vying for your attention, it can be difficult to focus on a single thing. Also, you may feel energized by doing things at the last minute. However, if you procrastinate and then have to rush to finish, you risk leaving some assignments incomplete or producing work that is less than your best. Select a few key items to work on and make those your top priority. Set a goal to complete those before adding new tasks to the list. Build extra time into your plan to allow for discussions and interruptions.
If you find a topic uninteresting, try to spark your curiosity by discussing the subject matter with experts, reading related articles or investigating individual details and components of the overall topic. Look for ways in which the material relates to topics you have more interest in, and try to view the assignment as a problem to be solved.
You learn by questioning, discussing, competing and challenging. While you may need time on your own to think about which ideas you want to pursue, you refine them through energetic discussion with other people. You like to show others what you know, so think of ways to share your knowledge. Take part in presentations, discussions, project work and study groups. Consider becoming a coach or tutor for people who are new to a topic you know well This will motivate you to learn more about it, because you must be able to explain and teach it to others.
You are a very effective speaker and debater. Seek out opportunities to examine and discuss ideas through debate. But remember, the intent is to learn, not to win. It's fine to defend your point with enthusiasm, but take care not to

Fo	r Learning Environments
	You learn best in a lively, social educational setting that offers lots of variety and flexibility. You need plenty of opportunities to exchange ideas with a diversity of people and gain perspective on many different viewpoints.
	Look for alternative programs that you can tailor to fit your own interests and don't require you to conform to a standard approach. Take advantage of interdisciplinary options and independent study programs. Mix up your course selections and schedule to add variety to your assignments and daily routine.
	Seek out instructors who will stimulate your creativity and encourage imaginative thinking and discussion. You thrive in a dynamic environment where you can talk through ideas and practice speaking and presenting to others.
	Outside of class, get involved in activities, volunteer positions, clubs and organizations where you can meet lots of new people and develop your leadership skills.
