

## **Your Personality**

### Your personality type is INTJ:

## Introversion (I) vs. Extraversion (E)

How we interact with the world and where we direct our energy.

#### Introversion

- Focus attention inward
- Enjoy tasks that require concentration
- Work best on one project at a time
- Work at a careful, steady pace
- Consider things fully before speaking

#### **Extraversion**

- Focus attention outward
- Enjoy a variety of tasks
- Seek out and need other people
- Work at a rapid pace
- Need to talk through their ideas

## Sensing (S) vs iNtuition (N)

What kind of information we naturally focus on and remember.

#### Sensing

- Focus on "what is"
- Like working with what can be seen and touched
- Apply past experience to solving problems
- Need specific and realistic directions

#### iNtuition

- Focus on "what could be"
- Enjoy theory and speculation
- Like thinking about the future and possibilities
- Need to use their imagination

## Thinking (T) vs. Feeling (F)

Make decisions logically and impersonally, or use personal values.

### Thinking

- Are motivated by achievement
- Enjoy analyzing problems logically
- Make fair and unbiased decisions
- Need to weigh the pros and cons to make decisions
- Can be tough negotiators

#### **Feeling**

- Motivated by work that is meaningful
- Sensitive to how issues affect people
- Like helping others and being appreciated
- Need decisions to be congruent with their values
- Need to work in a friendly environment

## Judging (J) vs. Perceiving (P)

More structured (finalize decisions) or more spontaneous (keep options open).

### Judging

- Enjoy work that allows them to make decisions
- Prefer a predictable work pattern and environment
- Work towards completing their responsibilities before relaxing
- Like to maintain control of their projects

#### **Perceiving**

- Enjoy flexible and changing work situations
- Like to be able to respond to problems as they arise
- Are more satisfied with fewer rules and procedures
- Need to have fun in their work

### **Your Personality Profile**

Logical, creative and clever, you are confident in your ideas and in your ability to meet or exceed your goals. Ambitious in everything you do, you are driven to be competent and original. You have a keen sense of what is possible and a global perspective. An excellent strategic thinker, you look beyond what is known to see connections between elements that are often very different.

You tend to be a perfectionist. You are critical and demanding of yourself and undaunted by opposition. Focused and determined to bring your vision to life, you will work tirelessly to produce a flawless idea or product. You tend to be much more interested in meeting or surpassing your own high standards than trying to please others.

You are such a complex thinker that your ideas are sometimes too complicated for others to follow. You may struggle to express yourself simply and can become irritated when people are slow to catch on. You can be harshly critical and may neglect to show appreciation or encouragement to those around you. You need to realize the importance of others' feelings.

Extremely independent, you will defend your position and stubbornly refuse to concede, even if others disagree. Only a sound and well-reasoned argument is likely to convince you to change your mind. You are controlled and keep your emotions in check, and generally don't like it when people overreact.

You are most interested in acting on your own ideas and concepts of the future, but may miss key, practical requirements in your plans that can render them unworkable. You are reluctant to share the details of a plan with others at an earlier stage in the process, because you are still refining it. However, this puts you at risk for completing a project before a critical error is noticed.

You described your profile as:

# Learning

Strengths	Challenges
Curious, driven to	Require constant intellectual stimulation
learn	Need space and time to read and
Interest in theory and complex subjects	reflect

The following recommendations are based on your results. Consider each and select the ones you think would work best for you.

### For Sending and Receiving Communication

topics of personal interest.

You have an excellent command of language and a wide-ranging vocabulary. Remember that some people may not fully comprehend your ideas, which can make them feel lost or excluded. Try to express complex ideas with simple words, detail and clarity.
You are extremely private and self-assured, but others may misread your attitude as arrogance. On occasion, try using a little humor and perhaps poke fun at yourself. It can help to break the ice, show you in a more personal light and demonstrate that you are capable of not taking yourself too seriously.
You are very direct and candid in your critiques. To sensitive people, this can sometimes feel overly harsh or rude. When providing feedback, take time to consider how to deliver the message in a positive and helpful way. Be sensitive to the other person's feelings and keep the focus on fixing the problematic issue or behavior. Also, try to avoid providing feedback when you're rushed or under stress, as you may react with less tact when you're feeling pressured.
Practice listening and responding to people when they share something about their lives or speak in emotional terms. While it may not be very comfortable for you at first, being open to occasional personal exchanges can help you establish a connection with people. Be willing to listen <i>and</i> to share your own thoughts and feelings.
Be receptive when others try to engage you in casual conversation. You probably dislike trivial conversations. However, exchanging a few pleasantries could provide an entry into a deeper, more interesting discussion about
