Fo	r Learning Environments
	Seek out a well-respected, academically challenging program with high standards, a good student-to-faculty ratio and top-rated teaching staff. Look for knowledgeable instructors who will encourage you to probe, test and ask difficult questions as part of your learning.
	Your ideal learning environment is an engaging setting that encourages innovation, achievement and original thinking. You like to be surrounded by high achievers like yourself with similar goals and standards. Look for opportunities to develop your leadership ability, distinguish yourself and stand out from your peers.
	Take advantage of internships, research initiatives and work-study programs where you can test your ideas and practice your leadership skills.
	While you may not think you have time for extracurricular activities, taking a break from your studies can provide stress relief and add balance to your life. You may enjoy attending athletics competitions or campus cultural activities. You can also get involved in clubs and organizations that provide opportunities to practice your debate and leadership skills. If you can't find a club that interests you, start one of your own.

	Practice patience. You are so determined to get things done that you may be tempted to make a snap decision or urge others to settle things. For important decisions, ensure that all the necessary information has been evaluated. Remember to consult others and to consider the impact your decision will have on people. If a decision is someone else's responsibility, don't push or try to interfere.
	Be willing to modify your plans. Once decided, you like to stick to the arrangement and move on. But sometimes mistakes are made or important details have been missed. If you're presented with a good reason to change a plan, be open to it.
	While you like to make improvements and try new things, be sure you can justify any changes you make. If an established procedure is efficient and practical, there may be no reason to alter it.
	Where possible, hand off detail-oriented tasks to colleagues who excel at working with facts or figures. You are more productive when left to focus on the broader perspective.
	Pay attention to your work-life balance. You can become so focused on your work that you may neglect other aspects of your life and end up stressed out or exhausted.
