

# **Your Personality**

#### Your personality type is INTP:

## Introversion (I) vs. Extraversion (E)

How we interact with the world and where we direct our energy.

#### Introversion

- Focus attention inward
- Enjoy tasks that require concentration
- Work best on one project at a time
- Work at a careful, steady pace
- Consider things fully before speaking

#### **Extraversion**

- Focus attention outward
- Enjoy a variety of tasks
- Seek out and need other people
- Work at a rapid pace
- Need to talk through their ideas

## Sensing (S) vs iNtuition (N)

What kind of information we naturally focus on and remember.

#### Sensing

- Focus on "what is"
- Like working with what can be seen and touched
- Apply past experience to solving problems
- Need specific and realistic directions

#### **iNtuition**

- Focus on "what could be"
- Enjoy theory and speculation
- Like thinking about the future and possibilities
- Need to use their imagination

## Thinking (T) vs. Feeling (F)

Make decisions logically and impersonally, or use personal values.

## Thinking

- Are motivated by achievement
- Enjoy analyzing problems logically
- Make fair and unbiased decisions
- Need to weigh the pros and cons to make decisions
- Can be tough negotiators

#### Feeling

- Motivated by work that is meaningful
- Sensitive to how issues affect people
- Like helping others and being appreciated
- Need decisions to be congruent with their values
- Need to work in a friendly environment

## Judging (J) vs. Perceiving (P)

More structured (finalize decisions) or more spontaneous (keep options open).

#### **Judging**

- Enjoy work that allows them to make decisions
- Prefer a predictable work pattern and environment
- Work towards completing their responsibilities before relaxing
- Like to maintain control of their projects

### **Perceiving**

- Enjoy flexible and changing work situations
- Like to be able to respond to problems as they arise
- Are more satisfied with fewer rules and procedures
- Need to have fun in their work

### **Your Personality Profile**

You are independent, curious and creative. Quite private, you like time alone to think things through or explore subjects and projects that really interest you. You tend to have a very small cluster of close, trusted friends and rarely initiate social activities. You prefer to get the most out of a few high quality social activities than take part in many shorter gettogethers.

You may have a real passion for science or the arts and enjoy learning new things. Inventive and imaginative, you are an "architect of ideas". You make quick and insightful connections, and enjoy coming up with original solutions to problems. But you get bored quickly, dislike repetition, and may struggle to explain your ideas simply and clearly to other people.

You are a very logical person and tend to remain calm in most situations. Unfairness and inconsistency bother you, and other people's opinions rarely influence you. You speak your mind and your actions are more motivated by achievement than by trying to please others. Your family and closest friends may not know how much you care about them because you rarely express your feelings.

You easily see both sides of an issue and enjoy healthy debate. But your relaxed attitude about deadlines and neatness can present challenges for your timeliness or following through on commitments.

You described your profile as:

# Learning

Strengths	Challenges
Eager to	Dislike repetition
learn	May get distracted
Enjoy complexity, theoretical concepts	May procrastinate
Analytical	☐ Need to
☐ Independent thinker	prioritize
Curious	May fear failure, obsess over
Do non-required study to broaden knowledge and	perfection
understanding	Need space and time to
☐ Skeptical	process

#### **Recommendations**

The following recommendations are based on your results. Consider each and select the ones you think would work best for you.

### For Sending and Receiving Communication

Look for ways to simplify communications, especially emails or other written forms. For example, use bullet points
and highlight or bold items that require a response. Provide examples and be as specific as you can.
You can be relied upon to provide an honest, impartial opinion. Take care that you are not <i>too</i> direct, however, or you
could come across as condescending. Your tendency to point out flaws may be taken as scornful or negative. Be
sensitive to the other person's feelings. Make sure your feedback is as positive and helpful as possible. Assess the
person's reactions as you're speaking and adjust accordingly.

Remember that some people may not fully comprehend your ideas, which can leave them feeling lost or excluded
Work at expressing yourself and your concepts in a clear and interesting manner. Include additional detail that wil
help your audience better understand.

П	You may need time to assess, reflect and compose your thoughts before replying to someone. In conversation, you
	can use body language — through making eye contact, nodding or using a gesture — to indicate that you're forming
	a response. If using email, send a quick note back to acknowledge the question and let the person know you will
	respond in full as soon as you've had time to consider your reply.

Be receptive when others try to engage you in casual conversation. Exchanging a few pleasantries could provide	de ar
entry into a more interesting discussion about topics of personal interest.	

# **Working with Others**

Strengths	Challenges
Not bothered by criticism	May appear arrogant or dismissive
☐ Unbiased ☐ Adaptable ☐ In-depth knowledge of many topics ☐ Remain calm in stressful situations	Prone to note defects or inconsistencies  Uncomfortable with emotions  Need to appreciate others' efforts  May seem aloof  May resist authority or input from others
Recommendations  The following recommendations are based on your results best for you.	lts. Consider each and select the ones you think would work
commitment, are too sensitive, or can't keep up with	team. Don't disregard people because they lack your focus and your theoretical or visionary insights. Everyone has value of their skills and perspectives, you can come to
	ream on a regular basis. You may not feel the need for feedback ople are more productive if they are praised for their efforts.
Take care not to alienate people by instantly rejecting others have to say. Your problem-solving mind will be	g suggestions that seem irrational. Listen carefully to what e tempted to point out flaws and offer advice or solutions. Not or wants to have an intellectual debate. They may just want to
	doesn't assume you are the expert. Try to view your teammates ir enthusiasm for a topic. That can help to generate more to be intimidated or turned off.
If you're in a leadership position, use your strengths to	o empower and direct your team. Make a point of praising and preciate their efforts. For optimal results, you may find it

### For Filling a Role

Analyzer: examining, testing, understanding and defining in order to explain things and solve
problems.

**Explorer**: looking for new and better ways of doing things, brainstorming ideas, encouraging others to use their talents and be innovative, exploring all the possibilities.

**Originator**: developing new ideas, perspectives and solutions, predicting and strategizing for what is to come, and creating a long-term vision.

# **Career and Pathways**

The careers listed below are all linked to your assessment results, with the careers at the top being the best match for your profile.
