### **Your Personality Profile**

You are independent, curious and creative. Quite private, you like time alone to think things through or explore subjects and projects that really interest you. You tend to have a very small cluster of close, trusted friends and rarely initiate social activities. You prefer to get the most out of a few high quality social activities than take part in many shorter gettogethers.

You may have a real passion for science or the arts and enjoy learning new things. Inventive and imaginative, you are an "architect of ideas". You make quick and insightful connections, and enjoy coming up with original solutions to problems. But you get bored quickly, dislike repetition, and may struggle to explain your ideas simply and clearly to other people.

You are a very logical person and tend to remain calm in most situations. Unfairness and inconsistency bother you, and other people's opinions rarely influence you. You speak your mind and your actions are more motivated by achievement than by trying to please others. Your family and closest friends may not know how much you care about them because you rarely express your feelings.

You easily see both sides of an issue and enjoy healthy debate. But your relaxed attitude about deadlines and neatness can present challenges for your timeliness or following through on commitments.
