

## **Your Personality**

#### Your personality type is INTJ:

## Introversion (I) vs. Extraversion (E)

How we interact with the world and where we direct our energy.

#### Introversion

- Focus attention inward
- Enjoy tasks that require concentration
- Work best on one project at a time
- Work at a careful, steady pace
- Consider things fully before speaking

#### **Extraversion**

- Focus attention outward
- Enjoy a variety of tasks
- Seek out and need other people
- Work at a rapid pace
- Need to talk through their ideas

### Sensing (S) vs iNtuition (N)

What kind of information we naturally focus on and remember.

#### Sensing

- Focus on "what is"
- Like working with what can be seen and touched
- Apply past experience to solving problems
- Need specific and realistic directions

#### **iNtuition**

- Focus on "what could be"
- Enjoy theory and speculation
- Like thinking about the future and possibilities
- Need to use their imagination

### Thinking (T) vs. Feeling (F)

Make decisions logically and impersonally, or use personal values.

### **Thinking**

- Are motivated by achievement
- Enjoy analyzing problems logically
- Make fair and unbiased decisions
- Need to weigh the pros and cons to make decisions
- Can be tough negotiators

#### **Feeling**

- Motivated by work that is meaningful
- Sensitive to how issues affect people
- · Like helping others and being appreciated
- Need decisions to be congruent with their values
- Need to work in a friendly environment

## Judging (J) vs. Perceiving (P)

More structured (finalize decisions) or more spontaneous (keep options open).

### Judging

- Enjoy work that allows them to make decisions
- Prefer a predictable work pattern and environment
- Work towards completing their responsibilities before relaxing
- Like to maintain control of their projects

#### **Perceiving**

- Enjoy flexible and changing work situations
- Like to be able to respond to problems as they arise
- Are more satisfied with fewer rules and procedures
- Need to have fun in their work

#### **Your Personality Profile**

Logical, creative and clever, you are confident in your ideas and in your ability to meet or exceed your goals. Ambitious in everything you do, you are driven to be competent and original. You have a keen sense of what is possible and a global perspective. An excellent strategic thinker, you look beyond what is known to see connections between elements that are often very different.

You tend to be a perfectionist. You are critical and demanding of yourself and undaunted by opposition. Focused and determined to bring your vision to life, you will work tirelessly to produce a flawless idea or product. You tend to be much more interested in meeting or surpassing your own high standards than trying to please others.

You are such a complex thinker that your ideas are sometimes too complicated for others to follow. You may struggle to express yourself simply and can become irritated when people are slow to catch on. You can be harshly critical and may neglect to show appreciation or encouragement to those around you. You need to realize the importance of others' feelings.

Extremely independent, you will defend your position and stubbornly refuse to concede, even if others disagree. Only a sound and well-reasoned argument is likely to convince you to change your mind. You are controlled and keep your emotions in check, and generally don't like it when people overreact.

You are most interested in acting on your own ideas and concepts of the future, but may miss key, practical requirements in your plans that can render them unworkable. You are reluctant to share the details of a plan with others at an earlier stage in the process, because you are still refining it. However, this puts you at risk for completing a project before a critical error is noticed.

You described your profile as:

(85% or more)

## Learning

Strengths	Challenges
Curious, driven to	Require constant intellectual stimulation
learn	Need space and time to read and
Interest in theory and complex subjects	reflect
☐ Independent	Overconfident
Analytical	May procrastinate
☐ Imaginative	Expressing ideas in simple

#### **Recommendations**

study

Enjoy reading, self-directed

Reasoning and debate

The following recommendations are based on your results. Consider each and select the ones you think would work best for you.

terms

Impossibly high goals

DE	ist for you.
	Naturally inquisitive and highly intelligent, you question everything and enjoy mastering new subjects, especially those of a theoretical nature. To satisfy your thirst for knowledge, seek out opportunities to challenge accepted wisdom, devise original concepts and study complex systems. Your instructor can suggest projects or further research on topics of interest to you.
	Pay attention to the due dates for your schoolwork. You set high standards for yourself and may want to explore a topic more deeply. However, if you try to consider all the possibilities and aim for a perfect result, you could complete the assignment late—or not at all. Focus on the end goal and, if necessary, be willing to ease up on your standards a bit.
	You may procrastinate if you don't find your learning material engaging. Try to spark your curiosity by discussing the subject matter with experts, reading related articles or investigating individual details and components of the overal topic. Look for ways in which the material relates to topics you have more interest in, and try to view the assignment as a problem to be solved.
	Be selective about the subjects you choose to examine more closely. If you try to become deeply knowledgeable in every topic that interests you, it can leave you overwhelmed and stressed out.
	While you are most comfortable learning on your own, it is sometimes helpful or necessary to do group work. Think about what you can learn from your peers. By understanding their strengths and abilities, you can come to value their input. For those times when you require solitude to reflect on ideas and theories, find a quiet spot away from others where you can concentrate. This might be a room at home or a quiet location in a public place such as a park or library.

# Practice taking part in discussions and debates. Give yourself time to consider the topic, think it through and form your response. Try to express your points clearly and simply.

#### For Learning Environments

Seek out an academically challenging program with high standards and a top-rate faculty in your area of interest
Look for competent instructors who will encourage you to probe, test and ask difficult questions as part of your
learning.

Your ideal environment is a setting that encourages innovative, original thinking, conducts leading-edge research
and is supplied with advanced technology and resources. You typically learn best alone or in a small group.

П	You may not be very interested in extracurricular activities. However, occasionally taking time away from your studies
	can provide stress relief and add balance to your life. You may find lectures, drama or music appealing, as just a few
	examples. You might also want to participate in physical activities with friends.

## **Work and Productivity**
