CURRICULUM OVERVIEW :

The students have been imparted the scientific knowledge, understanding and problem-solving abilities with reference to the graphical or numerical representations based on the topics: photosynthesis, preliminary test, plant growth, phytoextraction, flowers, seed dispersal, adaptations, extreme adaptations, survival, sampling techniques, studying the natural world, food webs, energy flow, decomposers, changing populations, and facing extinction. Focus on this Second term was to develop research and communication skills. This was done by providing various research topics related to syllabus, giving them the opportunity to explore and share their findings. Students have done individual project on making hydroponic/aeroponic system. Students' understanding on the concepts were assessed through quizzes. The concepts were taught to the students through MS power point containing relevant concepts, images, and videos. Reflections on scientific knowledge, understanding and skills were enabled through worksheets of multiple-choice questions and structured questions based on the topics mentioned above during the academic year 2020-21.
