Career Motivators are an important element in choosing a career else one's career after a while may seem boring and uninteresting.

### EXAMPLE

- ✓ To a businessman, profits (money) could be the motivational factor whereas to a politician, seeing the nation's development is the motivational factor.
- ✓ Being in social work career will get you lots of respect from society when compared to being engineer. But being a social worker would mean travel and less comfortable life as one requires to fight and help downtrodden.
- ✓ Being an engineer would mean more stability but would not bag respect as that of social worker. So if you want your career to be more comfortable and predictable then being an engineer would be a better option than being a social worker.

It may be true that with hard work and determination, one can perform well in any field. However, having an aptitude for that field can make things much easier. But what is aptitude? In the simplest of terms, Aptitude is nothing but the natural ease of learning something. And if that is there, a career journey can become very easy. For example, if your verbal communication skills are at VERY GOOD level, which means have high aptitude in that. However, your writing skills or your body language may be at average level or even below average. In such case you need to focus more on the low aptitude areas. This is the advantage of specifically identifying the problem areas. It reduces the amount of effort you need to put on your training for the improvements.
