Engineering Branch Selector Benefits

This report shares brief knowledge about all the major Engineering Branches.

With this Report you will get an answer to which Branch of Engineering you can opt for.

This report helps in matching your work interest with specific real life work situations as per different Branches of Engineering.

This report is very comprehensive, lucid, easy to understand and the results are displayed in the form of Table and Graph.

The report has been scientifically designed, formulated and customized in a unique manner for you.

This report provides you with personalized preferential analysis of different engineering branches.

Vedika, this graph depicts your scores on engineering categories. Locate your first longest bar followed by the others.

	Manufacturing Research & Practices		Agro based
	Chemical Research		Construction and Structures
	Natural Resources in water		Natural Resources on Earth
	Application of Bioprocess		Chemicals Compounds Study
	Application of Biology		Software Design
	Application of Electricity & Electronics		Of Surface and Substrates
	Flying and Mechanics		Machines & Tools

Table showing interpretation of the result

Engineering Group	Score	Engineering Branch in the Group	Position on Graph
Manufacturing Research & Practices	21	Production Engineering	1
Agro based	18	Manufacturing Engineering	
Chemical Research	17	Agriculture Engineering	2
Construction and Structures	17	Food Technology	
Natural Resources in water	16	Chemical Engineering	3
Natural Resources on Earth	16	Nuclear Engineering	
Application of Bioprocess	15	Architecture Engineering	3
Chemicals Compounds Study	15	Civil Engineering	
Application of Biology	14	Marine Engineering	4
Software Design	14	Naval and Ocean Engineering	
Application of Electricity & Electronics	13	Petroleum and oil Engineering	4
Of Surface and Substrates	13	Environmental Engineering	
Flying and Mechanics	11	Material and Metallurgical Engineering	5
Machines & Tools	10	Mining Engineering	
		Leather Technology	5
		Pulp and Paper Engineering	
		Textile Engineering	5
		Plastic Technology	
		Polymer Technology	6
		Rubber Technology	
		Biochemical Engineering	6
		Biomedical Engineering	
		Biotechnology	6
		Computer Science Engineering	
		Information Technology	7
		Electrical Engineering	
		Electronics Engineering	7
		Instrumentation Engineering	
		Optical Engineering	7
		TeleCommunication Engineering	
		Ceramic Engineering	7
		Paint Technology	
		Aeronautical Engineering	8
		Automation and Robotic Engineering	9
		Automobile Engineering	
		Mechanical Engineering	9

- » Vedika, this graph depicts your potential to study all the Engineering categories so that you can select the right Branch accordingly.
- » Potential refers to capacity, strength and caliber. Graph is divided into six equal sections : Very High, High, Above Average, Average, Below Average and Very Low.
- » A descriptor is added to all the sections where your score might fall in the next page.

Table showing interpretation of Potential Graph

Category	Description
Very High	Branch scores placed in this range are at very high position on the graph. As an engineering aspirant you should feel very confident about selecting these branches where your true potential will be utilized. Your abilities and interest are completely in consonance with the potential required to study these branches as well as to work as a professional in this Area. Although you are the right person to select and study these Branches yet we would recommend you to maintain the good study habits regularly and study with keen interest.
High	Branch scores placed in this Range are comparatively at High position on the graph. As an aspirant engineer you can go about selecting these. Although you are able enough to select and study these branches yet we would recommend you to study regularly, keep in touch with good class fellows and professors to remain motivated and guided also maintain the good study habits regularly and study with keen interest.
Above Average	Branch scores placed in this range are an above average position on the graph. As a prospective engineer can be enthusiastic about selecting these branches. Your abilities and interest are above average and you are blessed with the potential required to study these branches. We would recommend you to study hard regularly, keep in touch with good class fellows and professors to remain motivated and guided. Maintain the good study habits and try to develop applied knowledge apart from theoretical facts.
Average	Branch scores falling in this range are an average position on the graph. As an engineering aspirant you should firmly decide before selecting these branches. We would recommend you to study very hard regularly, keep in touch professors to remain motivated and guided. You need good study habits regularly and study with keen interest. Also try to develop applied knowledge apart from theoretical facts. Do not believe in Rote memory and develop more of conceptual knowledge for further implications.
Below Average	Branch scores falling in this range are at a below average position on the graph. As a hopeful engineering student you should notice this score level. Selecting these branches might not be a right decision for you in long run. It might not give the opportunities where your true potentials will be utilized. Try to match your abilities and interest in some Branch with the average to Higher score range to study these area. Although you might get the chance to select and study these branches yet we would not recommend you to select them. By personal choice and strong will if you still select these Branches you will have to study extremely hard and regularly, attend all the classes.
Very Low	Branch scores falling in this range are at very Low position on the graph. As an engineering aspirant you should notice and consider this alarming score level. Selecting these branches might not be a right decision for your true potentials to be utilized. Try to match your abilities and interest in consonance with the average to higher score range branches to study these as well as to work as a professional in that Area. Although you might be able to select and study these branches yet we would not recommend you to select them.
